No. (2981)-95-4—*San., dated 5th October* 1904.

The following Notification No. 1309, dated the 12th September 1904, issued by the Home Department *re* the pilgrimage to the Hejaz during the season of 1904, is republished for general information :—

By the Home Department Notification No. 1485, dated the 30th September 1903, the Governor General in Council under the powers conferred by Section 2, Sub-Section (I) of the Epidemic Diseases Act, 1897 (III) of 1897), directed that pilgrimage to the Hejaz during the season of 1904 might be permitted to any resident of India, subject to certain precautions, from the ports of Bombay in the Presidency of Bombay and of Chittagong in Bengal.

2. One of the precautions adopted during the pilgrim season of 1904 was the collection of all intending pilgrims at a central observation camp at or near the port of embarkation where they were detained for at least ten days, and where their wearing apparel, bedding etc., were disinfected previous to their embarkation. Experience has shown that the cost of this arrangement has been great and the inconvenience to the pilgrims the subject of much complaint. With the concurrence of His Majesty's Government, it has accordingly been decided that during the ensuing pilgrim season, pilgrims shall be permitted to proceed to the Hejaz after five instead of ten days' observation at the central camp and after satisfactory medical inspection and disinfection. The Hej will accordingly be open during the ensuing pilgrim season to any resident in India subject to the Regulations hereinafter stated.

3. The orders contained in the Home Department Notification No. 1485, dated the 30th September 1903, are hereby cancelled.

4. The Governor General in Council is pleased to direct—

(1) that no person shall be permitted to embark with the object of making a pilgrimage to Mecca except at the port of Bombay in the Presidency of Bombay.

(2) that no person shall be permitted to embark for such purpose at such port unless he has been kept under observation in a place appointed for the purpose at or near the port of embarkation until such time as the Medical Officer in charge shall be satisfied that all risk of such person conveying the infection of plague has completely abated ;

(3) that no passage tickets for the Hejaz shall be sold except at the place appointed for the detention of intending pilgrims under observation.

5. Although they have decided that, subject to the foregoing precautions, the pilgrimage to the Hejaz may be permitted, the Government of India think it necessary to repeat the warning given last year, that intending pilgrims will be well advised in deferring the fulfilment of their purpose until another season, in view specially of the stringent quarantine rules imposed by the Turkish Government and of the inconvenience and harassment to which it is likely that they will be subjected on arriving in Arabia.

No. 2772-42-31—*San., dated* 29—30*th September* 1904.

It is hereby notified for general information that the whole of the Mysore State will be deemed to be an "infected area" for the purposes of the observation system in the Mysore City as laid down in the provisions of the regulations issued with Notification No. 9384—Mis. F. 21-96, dated the 10th February 1898, under the Epidemic Diseases Regulation.

No. 2839-48-5—*San., dated* 30*th September*—1*st October* 1904.

Under Section 2 of the Epidemic Diseases Regulation of 1897, the Government of His Highness the Maharaja of Mysore are pleased to direct the introduction into the Towns of Saklespur, Arkalgud, Arsikere, Channarayapatna and Hole-Narsipur in the Hassan District, of the system of house to house inspection known as the supervision system as amended by Notification No. L. B. P. 759, dated the 10th December 1903, and to empower the Deputy Commissioner of the Hassan District to take such measures as he shall deem necessary for the due enforcement of that system.

No. (2981)-95-4—*San., dated* 5*th October* 1904.

The following Notification No. 1309, dated the 12th September 1904, issued by the Home Department *re* the pilgrimage to the Hejaz during the season of 1904, is republished for general information :—

By the Home Department Notification No. 1485, dated the 30th September 1903, the Governor General in Council under the powers conferred by Section 2, Sub-Section (I) of the Epidemic Diseases Act, 1897 (III of 1897), directed that pilgrimage to the Hejaz during the season of 1904 might be permitted to any resident of India, subject to certain precautions, from the ports of Bombay in the Presidency of Bombay and of Chittagong in Bengal.

2. One of the precautions adopted during the pilgrim season of 1904 was the collection of all intending pilgrims at a central observation camp at or near the port of embarkation where they were detained for at least ten days, and where their wearing apparel, bedding, etc., were disinfected previous to their embarkation. Experience has shown that the cost of this arrangement has been great and the inconvenience to the pilgrims the subject of much complaint. With the concurrence of His Majesty's Government, it has accordingly been decided that during the ensuing pilgrim season, pilgrims shall be permitted to proceed to the Hejaz after five instead of ten days' observation at the central camp and after satisfactory medical inspection and disinfection. The Hej will accordingly be open during the ensuing pilgrim season to any resident in India subject to the Regulations hereinafter stated.

3. The orders contained in the Home Department Notification No. 1485, dated the 30th September 1903, are hereby cancelled.

4. The Governor General in Council is pleased to direct—

(1) that no person shall be permitted to embark with the object of making a pilgrimage to Mecca except at the port of Bombay in the Presidency of Bombay.

(2) that no person shall be permitted to embark for such purpose at such port unless he has been kept under observation in a place appointed for the purpose at or near the port of embarkation until such time as the Medical Officer in charge shall be satisfied that all risk of such person conveying the infection of plague has completely abated ;

(3) that no passage tickets for the Hejaz shall be sold except at the place appointed for the detention of intending pilgrims under observation.

5. Although they have decided that, subject to the foregoing precautions, the pilgrimage to the Hejaz may be permitted, the Government of India think it necessary to repeat the warning given last year, that intending pilgrims will be well advised in deferring the fulfilment of their purpose until another season, in view specially of the stringent quarantine rules imposed by the Turkish Government and of the inconvenience and harassment to which it is likely that they will be subjected on arriving in Arabia.

The following Rules for the regulation of water-supply and for house-connections from the Water Works of the Chikmagalur Town are published for general information :—

I. The supply of water from the Chikmagalur Water Works being intended exclusively for *bona fide* domestic purposes, the water drawn therefrom, whether from public fountains and taps or from private house-connections, shall not be used for any other purposes whatsoever.

II. A supply of water for domestic purposes shall not include a supply thereof for any trade, manufacture or business or for fountains or for ornamental or mechanical purposes, or for watering gardens or roads.

III. Water which has been used for washing, bathing or other domestic purposes may be collected and used for gardening or other non-domestic purposes.

IV. The water may, however, be used for purposes prohibited with the special permission of the Municipal Board.

V. In the case of house-connections, the water drawn therefrom shall be used exclusively by the occupants of the house possessing the connections.

VI. Until further orders, private connections to houses will be limited to houses whose value is Rs. 800 and upwards and to localities where the capacity and pressure of the public water mains permit of such connections being made, without detriment to the street service. On the latter point the opinion of the Executive Engineer shall be final.

VII. All pipes, taps and other works required for a house-connection, shall be of such dimensions, character and material as the Municipality may approve, the pipe not exceeding ½ an inch in diameter and they shall always be under the control of the Municipality and shall in no case be interfered with by any others. They shall be supplied, renewed or repaired by the Municipality.

VIII. The cost of all pipes, taps and works required for a house-connection shall be borne by the householder applying for or desiring the connection, who shall pay in advance the estimated cost. The whole cost should be fully paid for before the house-connection is permitted to be used.

IX. The Municipal Board shall determine the size of each house-connection with due regard to the capacity and pressure of the public water mains.

X. The house-connection in any case is liable to be stopped or the supply reduced by the Municipality, without assigning any reason. When stoppage is due to exigencies which are previously foreseen, such previous notice as is possible under the circumstances will be given by the Municipality. If the Municipality has reason to believe that wasteful or unauthorized use is made of water drawn from any house-connection, it shall be its duty to stop such connection forthwith under this rule.

XI. Every householder possessing a house-connection shall pay a tax of eight annas per mensem and deposit with the Municipality the amount of such tax for twelve months.

XII. The Government reserves to itself the power, whenever it deems fit, to alter or modify the foregoing rules, or to abolish altogether the system of house-connections to be established hereunder.

XIII. Every house-connection shall be regarded as established, subject to the conditions and regulations contained in the rules as above, or as they may be altered or modified for the time being by order of Government.

XIV. No water-cart shall be allowed to take water from a public fountain, except at such places as may be specially set apart by the Municipality for that purpose. The Municipality shall cause notice boards to be put up at particular fountains, indicating that water-carts are allowed to take water therefrom.

XV. In consideration of the difficulties peculiar to the supply and distribution of water at Chikmagalur, the erection of any fountains or taps, public or private, and the opening of any house-connection for drawing water from the Chikmagalur Water Works be sanctioned by the Municipal Board at a regular meeting of its members.

B. P. 759, dated the 10th December 1903, and to empower the Deputy Commissioner of the Hassan District to take such measures as he shall deem necessary for the due enforcement of that system.

No. (2981)-95-4—*San., dated* 5*th October* 1904.

The following Notification No. 1309, dated the 12th September 1904, issued by the Home Department *re* the pilgrimage to the Hejaz during the season of 1904, is republished for general information :—

By the Home Department Notification No. 1485, dated the 30th September 1903, the Governor General in Council under the powers conferred by Section 2, Sub-Section (I) of the Epidemic Diseases Act, 1897 (III of 1897), directed that pilgrimage to the Hejaz during the season of 1904 might be permitted to any resident of India, subject to certain precautions, from the ports of Bombay in the Presidency of Bombay and of Chittagong in Bengal.

2. One of the precautions adopted during the pilgrim season of 1904 was the collection of all intending pilgrims at a central observation camp at or near the port of embarkation where they were detained for at least ten days, and where their wearing apparel, bedding, etc., were disinfected previous to their embarkation. Experience has shown that the cost of this arrangement has been great and the inconvenience to the pilgrims the subject of much complaint.

With the concurrence of His Majesty's Government, it has accordingly been decided that during the ensuing pilgrim season, pilgrims shall be permitted to proceed to the Hejaz after five instead of ten days' observation at the central camp and after satisfactory medical inspection and disinfection. The Hej will accordingly be open during the ensuing pilgrim season to any resident in India subject to the Regulations hereinafter stated.

3. The orders contained in the Home Department Notification No. 1485, dated the 30th September 1903, are hereby cancelled.

4. The Governor General in Council is pleased to direct—

(1) that no person shall be permitted to embark with the object of making a pilgrimage to Mecca except at the port of Bombay in the Presidency of Bombay;

(2) that no person shall be permitted to embark for such purpose at such port unless he has been kept under observation in a place appointed for the purpose at or near the port of embarkation until such time as the Medical Officer in charge shall be satisfied that all risk of such person conveying the infection of plague has completely abated;

(3) that no passage tickets for the Hejaz shall be sold except at the place appointed for the detention of intending pilgrims under observation.

5. Although they have decided that, subject to the foregoing precautions, the pilgrimage to the Hejaz may be permitted, the Government of India think it necessary to repeat the warning given last year, that intending pilgrims will be well advised in deferring the fulfilment of their purpose until another season, in view specially of the stringent quarantine rules imposed by the Turkish Government and of the inconvenience and harassment to which it is likely that they will be subjected on arriving in Arabia.

38. No person who has been convicted of a heinous offence under the Indian Penal Code shall be employed in the carriage or sale of liquor without the Deputy Commissioner's previous permission.

39. in the District of.....from the 1st day of.....190...
to the .....day of.....190...subject to the following conditions and stipulations to be observed by you, the said.....

CONDITIONS AND STIPULATIONS.

1. The exclusive privilege conferred by the license extends to the sale of Date, Palmyra, Cocoanut, Bagani and Dadasal toddy. But in tracts where both Date and Bagani toddy shops exist, the licensee of the Date Toddy shop shall not tap Bagani trees, and the licensee of the Bagani Toddy shop shall not tap Date trees, but both licensees can tap any of the other palm trees named above.

2. The Deputy Commissioner shall be at liberty to issue license for the sale of foreign liquors, for the manufacture and sale of country beer, and for the manufacture and sale of arrack and other country spirits.

3. The amount of rent shall be payable into the local Government Treasuries on printed chellans furnished for the purpose by Government, in equal monthly instalments commencing from 1st July 190 . No amount shall be paid to or received by the Excise Officers. In the malnad and semi-malnad taluks, the Deputy Commissioner may permit patels of villages who are not themselves licensees to receive payments not exceeding Rs. 50 from any individual at a time. But if the amount of annual rent for any shop does not exceed Rs. 12, the whole of it shall be paid in not more than three quarterly instalments. Each instalment shall be regarded as the rent for the month or quarter in respect of which it is payable. The licensee is not required to make any additional payment on account of local cess. Each month's or quarter's rent shall be payable on or before the 20th of the same month or before the end of the quarter. If default is made, the Amildar may, with the sanction of the Deputy Commissioner, by record in writing suspend or cancel the license, order the forfeiture of all deposits made by the defaulter, and proceed to re-sell or otherwise dispose of the shop or group of shops at the defaulter's risk (as soon after the last day of the month or quarter as may be possible), with effect from date of issue of license to the new purchaser, or from the date of other disposal. Provided, however, that instead of re-selling the same as above, the Deputy Commissioner may, in his discretion, direct the Amildar to issue licenses to sub-vendors or vendors under the defaulting licensee for rents, the aggregate of which is not less than the rent the defaulting licensee had agreed to pay. The officer who has power to suspend the license may, however, at his discretion, allow sales to continue pending re-sale or other disposal of the privilege.

NOTE.—The licensee of a Jatra shop shall pay the rent thereof in full before the Jatra begins.

4. For the supply of toddy to his shops the licensee shall have the privilege of obtaining, subject to tree-tax rules, toddy-yielding trees in the groves assigned to his shops or groups of shops, and he shall be at liberty to manufacture toddy from the trees in private lands, under private arrangements between himself and the owners of such lands. He may purchase toddy from any licensed toddy shop-keeper on application to the Inspector, who will grant the required permits on proof of the necessity for the same. No toddy except the produce of trees marked by a proper officer and tapped under a license shall be kept in the shop or offered for sale or sold.

5. For all toddy-yielding trees, tree-tapping licenses shall be annual. For the convenience of the licensee, the applications for tree-tapping licenses will be received, trees will be marked, and licenses will be issued during the fifteen days and pots may be attached to such marked trees during the five days immediately preceding the period to which they relate to take effect from the commencement of such period. Provided that no toddy shall be removed from the trees except during the currency of such license.

6. Persons applying for the issue of tree-tapping licenses will be responsible to Government for all sums payable as tree-tax on account of the trees licensed therein to be tapped and also for tree-rent in the case of trees on Government unoccupied lands and also for local cess thereon.

(b) On receipt of an application, the Inspector will at once take steps for the marking of the tree by an officer superior in rank to a Sub-Inspector, and for the timely issue of the license. Applicants for date trees shall get the requisite spaces on their stems prepared and point out to the marking officer, when required by the

latter to do so, the trees applied for by them. Should they fail to do so after reasonable notice; the tree-tax and tree-rent paid by them shall be liable to be forfeited at the Deputy Commissioner's discretion.

7. No tree shall be tapped, nor shall toddy be drawn from any toddy tree, nor shall any pot be attached to any toddy tree until the tree has been marked by the proper officer. But the removal of leaves for the purpose of making incisions and the preparation of the spathes or incisions for the drawing of toddy is permitted as soon as the application in the prescribed form has been delivered to the Treasury concerned.

8. (1) No tree shall be tapped for toddy without a license therefor to be obtained by payment of tree-tax at the following rates:—

Description of trees.	Rates of tree-tax including local cess per tree per annum. Rs.	a.	p.
Date	1	1	0
Cocoanut	2	2	0
Palmyra	1	9	6
Bagani or sago	1	9	6
Dadasal (Arenga wightii)	0	8	6

NOTE.—The licenses will be free of tax to the Mysore Government in the cases specified in clause 15 (1) (b) below.

(2) In addition to the above tax tree-rent at annas 4 per tree per annum with local cess at 3 pies thereon shall be paid for all Government trees applied for being tapped for the supply of toddy shops whether within or outside the Mysore territories or in the Civil and Military Station of Bangalore.

NOTE.—No trees upon Government occupied land can be tapped without the consent of the owner. The present arrangement as regards trees on alienated land will hold good subject, of course, to the levy by Government of tree-tax.

9. The tree-tax shall be payable in the following instalments, unless the Excise Commissioner shall otherwise direct:—

Period within which license is applied for	Proportion of tree-tax to be paid at the time of application for license	Proportion of tree-tax to be paid on the first of the 3rd month
Between 1st July 190 and 30th April 190	One-third	The remaining two-thirds.
Between 1st May 190 and 30th June 190	The whole	...

10. (a) The tree-rent together with the local cess on tree-rent and also the local cess on the tree-tax for trees applied for shall be payable in full at the time of application for tapping license.

(b) If any instalments are not paid within the time, the license shall be liable to be cancelled or suspended under Section 26 of the Excise Regulation.

(c) When the licensee makes default and his shop is re-sold, his rights to and claim on, Government trees cease and determine.

(d) In case of default, the Amildar with the Deputy Commissioner's permission will order the suspension of the tapping license till the arrears are paid up and if, after receiving notice of such suspension, the defaulter continue to tap the trees, he will be prosecuted for illicit tapping.

11. The deposit made by the licensee will be taken as security for the due performance of the conditions of the license and if not forfeited or credited or otherwise disposed of shall be taken in payment of the instalment due in the last months or month of the period of the license. All arrears and deficits payable by the licensee shall, with interest at 6 per cent per annum, be recoverable from him or his surety

under the rules in force for the recovery of land revenue. Interest shall be calculated on all arrears from the date of default and on deficits from the date of re-sale or disposal otherwise. No remission or abatement of the rent of compensation shall, on any account whatever, be claimable by the licensee, nor will he be entitled to any compensation for any trees withdrawn or taken for the public purpose.

12. If the Deputy Commissioner does not confirm the re-sale, he may make such other arrangements as may appear advisable for the remainder of the period of the lease, in which case he shall serve a notice on the defaulting licensee informing him of the nature of the arrangements made.

13. If the licensee of a group of shops wishes to establish a depot for depositing toddy required for distribution to his shops, he shall obtain a license for it in the prescribed form. The passes issued with the toddy transported, shall be subject to examination and check by the officers authorized in this behalf.

14. The tree-tax on toddy produced by trees in the Madras Presidency but consumed in the Mysore State, will be credited to the Mysore Government. The rate of tree-tax to be paid in such cases will invariably be the highest in force on either side of the frontier. Tree-tax on trees in the Madras Presidency for which tapping licenses are about to be taken out by Mysore shop-keepers, must be paid in one instalment to the Amildar of the Taluk concerned in the Mysore State, who will grant a receipt in the prescribed chellan form and certify at the foot that the applicant is a person entitled to take out tree-tapping licenses. The applicant will then make his application to British authorities in accordance with the Madras Government Tree-tapping Rules, and will obtain a transport permit from the Inspector concerned in the Mysore State for the transport of the toddy drawn from the frontier to the shop or depot for which it is intended, after having complied with all requirements of the Madras Government Rules.

15. (1) Tree-tapping licenses in the prescribed form shall be issued on the application :—

(a) of licensed toddy shop-keepers or of their duly authorized agents,

(b) of tree-owners in coffee estates, hittals and kans in the malnad free of the prescribed tree-tax for drawing toddy for *bona fide* domestic purposes as per Government Order No. 11897-906—Excise 485, dated 20th June 1898, for such number of trees as may be found necessary by the Excise Commissioner.

The licenses may be issued in the name of the applicant himself or of his nominees.

16. Applications for the grant of tree-tapping licenses must be made in the prescribed form to the Excise Inspector of the Range concerned through the local Treasury. Forms may be obtained from him or the Assistant Inspectors under him.

17. Applications for tree-tapping licenses, for trees in occupied or alienated lands, should be countersigned by the owner of the trees intended to be marked, in token of his consent. Applications for tree-tapping licenses for trees in State Forests and Plantations should be countersigned by the Forest Range Officer in token of his consent.

18. Deputy Commissioners may, subject to the orders of the Excise Commissioner from time to time, prescribe, the minimum number of trees for which license will be granted, and the minimum number to be entered in a single application. They may also direct that the trees situated in one village only shall be included in an application.

19. Every person to whom a tapping license is granted for the manufacture of toddy shall observe the following rules in tapping date trees :—

(a) Date trees shall be tapped only by professional men.

(b) Trees tapped one year shall not ordinarily be tapped the next year.

(c) Trees shall not be over-tapped or over-worked.

(d) In no date trees shall the initial incision be made at any point less than 3 feet from the ground except in places where permission is specially given by the Excise Commissioner.

(e) The depth and width of the incision shall not exceed one-third of the diameter of the tree, and the length of it shall not exceed eight inches.

(f) Every fresh incision shall not be less than one foot above the last incision except in localities where permission is specially given.

(g) The central spike-like clusters shall not be touched. Of the lateral leaves not less than two layers of leaves shall be left, reckoning from the layers immediately next to the central clusters down to the top line of the incision; or in other words, above the top line of the incision not less than eight leaves shall be left excluding the central spike-like clusters, on that face of the tree on which the incision is made.

(h) The licensee shall not cut or injure or permit to be cut or injured the trees licensed to him or any other trees.

(i) The licensee or his employer will be liable to pay a fine of one rupee for each tree in excess of three per cent of the number of trees marked for him which may die from over-tapping or careless tapping either during the lease or within six months after its expiration.

20. The licensee shall not interfere with the licensees for cutting date leaves for mat-making, rope-making, basket-making, or for agricultural or other purposes, when they make use of the trees assigned for such purposes, and not reserved for tapping.

21. The licensee of the depot or shop or group of shops will be required to keep true account of the receipts and issues of toddy from day to day in ink in the prescribed form. The accounts and permits shall be in printed books which may be obtained from the local Excise Officer on payment of cost price. Permits for toddy received and the counterfoils of permits issued must be carefully filed. The signing of blank permits for subsequent issue is prohibited. The accounts and counterfoils of permits shall be preserved and delivered to the local Excise Officer immediately after the close of the lease. They shall be produced when asked for by the Deputy Commissioner or any officer appointed by him or by an Excise Officer not below the rank of an Excise Assistant Inspector. Such returns and information as may be required by the Deputy Commissioner or Excise Officer not below the rank of an Excise Assistant Inspector shall be furnished by holders of licenses without delay.

22. The sales must be conducted in a suitable building which shall have only one door, and no windows or other opening shall be allowed to the rear or at the ends of the building. The bar at which toddy is sold shall be opposite the entrance door and so situated that all persons inside can be seen by any one passing to and fro in the street, and no second room shall be used for the sale of toddy, or be kept open for customers.

23. Toddy shall not be sold except in shops duly licensed by the Deputy Commissioner, in the prescribed form and no new shops shall be opened without the previous sanction of the Excise Commissioner. Tree-foot sales or sales in the open, or the disposal of toddy in any other manner unauthorized by the rules, are strictly prohibited. Provided, however, that in Bagani tracts, the licensee who has purchased the right of vend of Bagani toddy, may permit the tapping of Bagani trees for domestic consumption as well as for sale, within the limits of the village purchased by him.

24. The Deputy Commissioner may, whenever he thinks fit, direct shops to be closed or permit transfers of shops from one place to another within two hundred yards of the sanctioned site. A sufficient supply of toddy shall be maintained in all sanctioned shops, the quantity being such as may be fixed by the Excise Divisional Officer.

25. The licensee shall place the license granted to him in a conspicuous place in the shops.

26. The right is reserved to the Deputy Commissioner to grant occasional licenses for the sale of toddy on the occurrence of fairs, festivals, etc., in places in

the vicinity of which, there are no regularly licensed shops. Such licenses shall ordinarily be granted to shop-keepers, who usually supply the locality. Their period shall not exceed 15 days and the fee to be paid therefor shall be fixed at the Deputy Commissioner's discretion unless he decides to sell the same by public auction.

27. A signboard shall be affixed in a conspicuous part of the front of each shop containing in the local vernacular, the name of the shop-keeper, number of his license and the rate at which toddy is sold by him. 28. The licensee shall prevent all drunkenness or disorder or gaming within his shops.

29. No shop shall be opened before sunrise or kept open after 9 P.M., except under special authority. The shop shall be kept open during the authorized hours, unless its temporary or permanent closure is authorized by the Deputy Commissioner.

30. The licensee shall not harbour robbers or thieves or disorderly or riotous persons or prostitutes or soldiers or others known or believed to be deserters. enter and examine the premises to test measures in use and the toddy under sale and to call for and check accounts in the shop.

37. The licensee shall have such measures tested and stamped at his own expense.

38. No toddy shall be sold or given to any European Non-Commissioned Officer, private soldier, or to any European or Eurasian camp follower, or to any member of the families of any of the aforesaid persons, without the permission, in writing, of the Commanding Officer, or of some person duly authorized by him in this behalf; nor to any European or Eurasian sailor, nor to any sepoy, member of the Police Force, Excise Officer, or a servant of a Railway Company whilst on duty; nor to any European vagrant under escort of the Police; nor to any child under twelve years of age, nor to any insane person for consumption on the premises: nor shall any toddy be sold *on credit.*

Such soldiers may be supplied with toddy by such persons as the Government may select for the purpose, notwithstanding the licensee's exclusive privilege.

40. The Government reserves the power to terminate the lease on public grounds, on giving the licensee 15 days' notice and awarding a reasonable compensation to the licensee. The licensee will have no claim to compensation or remission on account of any arrangements which may be made by Government in regard to country beer or other description of liquor than toddy.

41. The license shall not be transferable by sale, gift or otherwise or be sub-rented except with the permission of the Excise Commissioner. Resignation of shops in whole or in part will be summarily rejected by the Deputy Commissioner.

42. No person shall be appointed by the licensee for the management of any such privilege without the Deputy Commissioner's previous approval.

43. All engagements entered into by agent, shall be deposited with the Deputy Commissioner within one month from the date of execution.

44. If it comes to the licensee's knowledge that any person employed by him in the manufacture, carriage or sale of toddy commits any breach of the Excise Law or of the engagements entered into by him, it shall be the licensee's duty to report the matter to the Deputy Commissioner, and to comply with the directions of the Deputy Commissioner respecting the further employment of such person.

45. The licensee of shop or group of shops shall not, during the term of the license, have any interest in the exclusive privilege of vending arrack within 5 miles from it nor permit any person having interest in the exclusive privilege of vending arrack within the said area of 5 miles to hold any share or interest in his exclusive privilege of selling toddy; nor shall he, during the term of his license, without the written permission of the Excise Commissioner, have any interest, direct or indirect, in any toddy shop or farm outside the territories of Mysore, or in the Civil and Military Station of Bangalore.

licensee, or to place under the management of Government. When a license is cancelled, the rent for the whole period of the license shall become due at once; and all loss caused to Government by the cancelment of the license or by the re-sale or other disposal of the privilege shall be made good by the licensee, or his surety in the manner specified in Condition 54. All sums due shall be recovered in the same manner as if they were arrears of land revenue.

49. An Inspection note-book with the pages numbered consecutively for inspecting officers to enter their remarks, shall be maintained and be handed over to the Excise Inspector in charge of the Range or any officer authorized by him to receive it on a receipt being given therefor.

50. The imposition of a fine, or the forfeiture of a deposit, or the cancellation of the license under the last preceding condition, shall not be held to prevent the prosecution of the licensee or his agents or employés for any offence punishable under the law for the time being in force.

NOTE.—For continuing breaches of a license, continuing fines may be imposed.

51. No person who has been convicted of any heinous offence under the Indian Penal Code shall be employed in the carriage or sale of liquor without the Deputy Commissioner's previous permission.

52. If the licensee shall be convicted on prosecution before a Magistrate of any offence against the Excise Regulation or Opium Act or other law for the time being in force, which, in the Deputy Commissioner's opinion, renders him unfit to hold the license, it shall be lawful for the Deputy Commissioner to declare his license forfeited or sell or otherwise dispose of the privilege at the risk of the licensee.

53. All sums payable by the licensee may be deducted from the amount of his deposit, or recovered by attachment and sale of the property of the licensee or his surety, under any law for the time being in force for the recovery of arrears of land revenue.

54. The licensee shall be bound by the provisions of the Excise Laws and Rules thereunder for the time being in force and by the terms and conditions of the license. Gen. & Rev. Dept.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Resolution of the Government of India in the Home Department No. 493—505, dated the 2nd August 1904, regarding examinations in the Persian language.

The Government of India have had under their consideration the question of reforming the examinations in the Persian language, which are at present conducted under the rules contained in the Home Department Notification No. I, dated the 2nd January 1880, so as to give them a more practical character. Experience has shown that the present system of examination is not calculated to ensure such a knowledge of the spoken language as it is essential that officers should have in dealing with Persian-speaking people. The Governor General in Council attributes the failure of the present system in this respect largely to the fact that most of the existing text-books are antiquated and do not introduce candidates to modern and colloquial Persian. In order to remedy these defects the Government of India were inclined to abolish, so far as the high proficiency and degree of honor examinations are concerned, the requirement that candidates must be examined in certain prescribed text-books, and to leave it to them to acquire the language in their own way and to prepare themselves generally for the tests prescribed. It seemed to them that such a reform would, by encouraging a wider reading, conduce to a more healthy knowledge of the language than can be acquired by the constant re-reading of a few selected text-books. With the object of assisting candidates in the choice of their reading, the Governor General in Council proposed to publish a list of typical books and literature suitable in point of difficulty to the character of the high proficiency and Degree of Honor examinations respectively. It was intended, not that the examinations should necessarily be confined to the literature indicated in the list, but that the passages set for translation at either examination should be selected from writings of a standard of difficulty as nearly identical as possible with that of the listed books. The Government of India thought that it would be necessary to retain text-books for the higher standard examination, and the only change which they contemplated making in respect of that examination was the substitution of more modern works for the existing text-books.

2. Upon these proposals the Government of India invited the opinion of the Governments of Madras and Bombay in both of which presidencies examinations in the Persian language are held. Both the Government of Madras and the Government of Bombay have concurred generally in the suggested reform. The latter Government have, however, urged that, in the interests of sound scholarship, candidates for the Degree of Honor test should be required to read in addition to modern works at least two masterpieces (one prose and one poetry) of ancient classical literature. To secure uniformity of standard the Government of Madras recommend that the new rules should declare, either that there should be two sets of papers, one containing questions taken from the books scheduled as typical, and the other from books outside the list, or that all the questions should be set from books outside the list. Upon consideration of these suggestions the Government of India have decided to modify their original proposals by directing (*a*) that the Degree of Honor test shall comprise the whole range of the language and demand a knowledge of classical as well as of modern Persian, and (*b*) that half the passages for translation at the High Proficiency and Degree of Honor examinations shall be selected from the listed works and half from works of a similar standard of difficulty.

After consideration of the various suggestions which they have received as to the literature which should be included in the model list, the Government of India have selected those specified in the annexed schedule as representing the most suitable examples of Persian literature for the purpose in view. A list of the grammars which are recommended as most likely to assist students in their reading has also been included in the schedule.

3. An important part of the examination consists of testing the ability of a candidate in reading and translating manuscript fluently. The Government of India understand that candidates have hitherto been hampered in preparing themselves for this portion of the examination by the difficulty of obtaining satisfactory specimens of Persian correspondence, and they have therefore obtained specimens of correspondence from Teheran and Bushire, which they have caused to be reproduced by photo-zincography. These specimens can be obtained on an application to the marginally noted officers. In other respects the Governor General in Council considers that the present tests should remain unaltered, except that, as regards the high proficiency examination, the passages set for translation from Persian into English should not necessarily be in narrative style.

Secretary to the Board of Examiners, Calcutta.
Ditto ditto Madras.
Secretary to the Civil and Military Examination Committee, Bombay.

4. The only change which will be made in respect of the higher standard examination is the substitution of more modern works for the existing text-books. The following are the works which the Governor General in Council has decided to prescribe in future for this purpose :—

1. A selection (to be made) from the 'Tarikh-i-Sasaniyan.'
2. A selection (to be made) from the 'Safar-Nama-i-Shah-i-Iran.'
3. 'Narrative of Mrs. Hortestet' translated by Itimad-us-Sultana.

ORDER.—Ordered that a copy of the above resolution be forwarded to the local Governments and Administrations marginally noted, and to the Military and Foreign Departments of the Government of India.

PART IV.

OFFICIAL PAPERS.

ADDRESS

OF THE

DEWAN OF MYSORE

TO THE

REPRESENTATIVE ASSEMBLY.

21st October 1904.

GENTLEMEN,

In welcoming you in the name of His Highness the Maharaja once more to this city, I am glad to say that we meet this year under circumstances which have enabled us to enjoy some immunity on account of an abatement in plague. The marked interest evinced in this Assembly by His Highness opening its first session after his assumption of the administration, and the words of counsel spoken then have added to our responsibilities and deepened our gratitude to His Highness for his solicitude in the welfare of the country and the advancement of his subjects.

One event to which I wish to make a reference at the very commencement is the departure from our midst of our former British Resident Sir Donald Robertson to seek a well-earned rest in his native country after a long career of usefulness. His intimate association with the Government of this country during the minority of His Highness has left an abiding mark; and on this public occasion when we first meet in his absence, I take the opportunity of thanking him in behalf of us all for the interest he took in the affairs of Mysore. He has our best wishes for many more years of a bright and happy life.

I may take this opportunity of also mentioning of the honor we had during the year of a visit from that brilliant British General and present Commander-in-Chief of India, Lord Kitchener of Khartoum.

The constitution sketched in my last address has remained the same except for a change in one respect. A Revenue Commissioner was appointed as you know, with the specific object of providing for efficient supervision of the Revenue Department. He was also expected to make frequent tours and inspections. These objects were imperfectly realised principally on account of the combination of the office of the Revenue Commissioner with that of the Revenue Councillor. The latter had also to deal with cases in which he had already passed orders or expressed an opinion as Revenue Commissioner. On these and other grounds a separate Revenue Commissioner was appointed with whose duties were combined those of the Director of Statistics, who, it was found, after the completion of the Census, had not enough work to occupy his full time—an arrangement that has commended itself from the standpoints of economy, efficiency and sound principle.

With a view to secure the full benefits of the reformed methods of work recently introduced by the Government in the Account Department of the State, a financier of experience from the British Account Department has been selected as Comptroller for a period of three years. A financial branch has been organized in the Revenue and General Secretariat where other suitable reforms have also been introduced on the model of the Revenue and Agricultural Secretariat of the Government of India, those which were previously adopted from time to time being found partial and imperfect. Our thanks are due to the Government of India for their kind help in this matter. As a result of these reforms, the Muzrai Secretariat was separated from, and the Forest Secretariat was amalgamated with, the General Secretariat.

Finance.

The total income and expenditure of the year amounted to Rs. 214,31,063 and Rs. 218,96,459 respectively.

The ordinary receipts amounted to Rs. 172,25,706 and the interest on investments to Rs. 1,91,537. The income from Railways was Rs. 7,08,796; that from Gold Mining was Rs. 18,33,804 and from Cauvery Electric Power Rs. 14,71,220.

The expenditure excluding that on interest Rs. 2,86,440, Railways Rs. 7,20,360 and Cauvery Power Installation Rs. 10,49,814 was Rs. 198,39,845.

The year's transactions on the whole show an excess expenditure of only a little more than Rs. 4,65,000 against

an anticipated deficit of about nine lakhs. The receipts during the year showed an increase of nearly eight lakhs over the estimate, which was mainly due to a large share of the Gold Mining Royalty having been credited to account within the year, (Rs. 3,01,705), to increased Railway earnings (Rs. 1,45,540) and increased consumption of Cauvery Power (Rs. 2,86,072). Simultaneously, certain savings also occurred or were enforced under the budgetted heads of expenditure. During the year there were also certain extra charges which could not be foreseen when the budget was framed. The breach of the Palar series of tanks in the Kolar District led to an enhanced expenditure of a little over two lakhs for their repairs and an addition of two lakhs was made to the Civil List. Our budget had provided for an expenditure of a little more than 215 lakhs, and but for the unforeseen charges mentioned above, you will perceive that the year would have really ended in an equilibrium.

Now comparing the receipts and the expenditure of the year with those of the year previous to it, the noticeable decreases in ordinary receipts were under Land Revenue and Sayer. The decrease in the former (Rs. 2,09,239) was due to the collection being less by about a lakh; to the transfer of about Rs. 73,000, being assessment on vacant building sites, to the head of mohatarfa, under the orders of 29th August 1903 revising the rates of levy on these sites; and the diminution by Rs. 33,066 in the sale proceeds of occupied lands. The fall in Sayer (Rs. 47,569) was on account of the smaller collection of supari halat. There were increases under Excise Rs. 72,000, Forest Rs. 79,000, Stamps Rs. 20,000 and other items.

Taking the expenditure now into consideration, the amount spent on the Second Cauvery Installation during the year was Rs. 10,49,814, and all the extraordinary items which I explained in my address of last year, such as the Palace reconstruction, Gold Field Water-supply, Marikanave Project, Installation and Delhi charges, Mysore City Trust, Empress Memorial, Plague and others, cost in the aggregate Rs. 22,76,000. About 3 lakhs were charged to provincial expenditure on account of arrears of maintenance charges of the Chamarajendra Water-works payable by the Bangalore City Municipality. There were also small increases of expenditure under Forest conservancy (Rs. 40,692), Education (Rs. 30,000), Medical (Rs. 69,918) and under a few other items. The table in your hands gives in detail explanations for the variations in the different items of revenue and expenditure.

The opening balance on the 1st July last was Rs. 134,74,685, of which Rs. 42,87,700 were in Government

securities and the rest in cash—Rs. 61,41,074 being in the Bank of Madras, Rs. 29,93,891 being in the State treasuries and Rs. 52,020 being with Messrs. Coutts & Co. The closing balance of Government surplus was Rs. 44,24,953.

The budget estimates for the current year provide for an income of Rs. 177,04,000 from Civil and Public Works heads, Rs. 17,00,000 from Gold Mining royalty, Rs. 15,00,000 from the sale of Electric Power and Rs. 5,61,000 from Railways, making an aggregate of Rs. 214,65,000 which is slightly in excess of the revenue realized during the previous year. The total expenditure is estimated at Rs. 219,75,000 which includes considerable provisions of an extraordinary nature. The capital outlay on the Cauvery Power Second Installation, and the Bangalore Electric Lighting and the Marikanave Project amounts to 14 lakhs. The outlay on the construction of Railways and the net expenditure on the Railway revenue-account come to 2¾ lakhs. Large allotments for special Public Works, some of which were begun in the previous years, have also been made:—4½ lakhs for the reconstruction of the Palace, over two lakhs for the restoration of the tanks which were breached during the heavy rains of last November, 1¼ lakhs for the Gold Field Water-supply Project, 1¼ lakhs for the restoration of Chikdevaroyasagara and Hemagiri anikats and Sriramadevaru dam, one lakh for Military buildings and one lakh for other special Public Works. For the improvements of Bangalore, Mysore and Shimoga, a grant of over 4¼ lakhs has been made. One lakh is provided for plague expenditure. The other special miscellaneous charges are,—the provision of a lakh for a statue of His Highness the late Maharaja Chamarajendra Wadiyar Bahadur and of half a lakh for the adjustment of outstanding charges in connection with the Delhi Camp. The programme of the year's operations therefore provides for an aggregate extraordinary expenditure of nearly 34½ lakhs, while the revenue derived from special sources after meeting the cost of special establishments maintained for the purpose is about 28½ lakhs. Excluding these extraordinary items on both sides of the budget, the anticipated net result of the ordinary revenue and expenditure of the year is a surplus of about a lakh.

Of the large projects undertaken, the First Installation, Cauvery Power, has been completed and is yielding us a handsome revenue. The Second Installation will shortly be completed and begin to pay from the second half of the current official year. The Gold Fields Water-supply Project is also practically complete and will ere long bring in the expected revenue. The major portion

of the Bangalore Electric Lighting Works will be completed during the current year. In a year or two, the Marikanave and the Palace reconstruction works will be finished. With the completion of these projects, much of the extraordinary expenditure which is being now incurred will diminish, and the net annual income realized from them, which will exceed 30 lakhs, will enable us to lay by substantial savings in future. It will be remembered that an invested surplus of 100 lakhs clear of debt heads and a working balance of 75 lakhs at the beginning of the official year were stated last year to be essential to place our financial position on a safe footing. Our revenue surplus balance on 1st July last was Rs. 44,24,953, which it will be our persistent aim to raise to the required level of a crore of rupees in a few years by incurring extraordinary expenditure with care, and thereby conserving our surpluses. We may have however to direct our attention to the Railway development. Three different lines have been estimated for and out of these the Nanjangud-Erode line which promises to be useful may have to be taken up at an early date.

As for the amount required at the beginning of the year for working the treasuries it is satisfactory to note that our cash balance is in a fair way of regaining its normal proportion and the balance on 1st July last was Rs. 16,86,985 more than the minimum of 75 lakhs required on that date. Twenty-two lakhs of this amount have, I am glad to say, since been invested in the Government of India Securities.

Local and Municipal Revenue.

The receipts under all heads of Municipal income amounted to Rs. 8,33,680. Including the opening balance, the sum available for expenditure during the year was Rs. 11,58,825. The total expenditure incurred was Rs. 7,60,645. The chief items of expenditure were Rs. 1,80,530 on conservancy, Rs. 14,585 on Registration of births and deaths, Rs. 2,05,391 on Public Works, Rs. 38,488 on Education, Rs. 50,568 on Lighting, Rs. 30,021 on Charitable Grants including Dispensaries, and Rs. 2,41,062 on Miscellaneous items.

The income under all heads from District Funds amounted to Rs. 6,84,857 and including the opening balance, the sum available for expenditure was Rs. 10,54,840. The actual expenditure was Rs. 6,64,204 of which Rs. 5,17,058 was spent on Public Works, Rs. 20,873 on sanitation, Rs. 25,434 on medical aid, Rs. 24,064 on accommodation for travellers and the rest on miscellaneous items.

The income under the head of Local Funds General amounted to Rs. 1,06,391. Adding to this the opening

balance of Rs. 3,03,928, the sum available for expenditure Rs. 4,10,319, of which an expenditure of Rs. 1,70,145 was incurred during the year.

Insurance.

The financial position of the State Life Insurance Fund was investigated and reported upon by an actuary in Edinburgh who found it to be very satisfactory. The more favorable rate of bonus guaranteed by this scheme, the extremely low rate of expenses of management, being but one-seventh of the average expense of the offices doing business in India, and the policy whereby the rate of interest earned by the fund has been fixed by Government at 3½ per cent per annum on each month's balance, are stated to be the main factors that have contributed to the excellence of the State Insurance system as compared with other systems. At the end of the year, the closing balance of this fund was Rs. 10,27,277-10-1.

Rain-fall and Season.

The average rainfall in Mysore for the year 1903-04 was 55·49 inches, which was 13·00 inches more than that for the preceding year and 10·17 inches more than the average for 31 years since 1870. The year is likely to remain ever memorable owing to the disastrous effects of the torrential rain which fell in the Kolar District and which swept away nearly the whole of the famous Palar series of tanks. In spite of these circumstances, the season was otherwise favourable. To relieve any possible distress in Kolar, His Highness the Maharaja was pleased to grant a substantial donation from the privy purse.

The unfavourable reports of the withering of crops for want of rain during the past few weeks which were being received from all the Districts were causing some anxiety. The timely showers, which have recently fallen have, I am glad to say, saved the situation and the prospects have everywhere now considerably improved and there is no reason to apprehend any large failure of crops.

Agriculture, Industry and Trade.

During the year under review, there was a net increase of 30,455 acres in the extent of land under occupation with an increase in assessment of Rs. 38,842. The net diminution under coffee was 1,940 acres with a net assessment of Rs. 489.

Revision Settlement.

As announced in my address of last year, the Revision Settlement was introduced into the taluks of Davangere and Hiriyur. The three taluks of Holalkere, Chitaldrug and Jagalur are now ready and the new rates will be announced next cold weather. The recently formed Taluk of Hosadurga is made up of parts of Holalkere and Hiriyur Taluks.

The average increase of assessment on account of the revision settlement has been calculated to be 22 per cent for Davangere, 20 per cent for Hiriyur, 15 per cent for Chitaldrug and 18 per cent for Holalkere.

The most noticeable effect of the new revision has been upon the garden rate, which has undergone considerable diminution. The average rate has been reduced in Davangere from Rs. 4-6-11 to Rs. 2-13-9 and in Chitaldrug from Rs. 3-14-5 to Rs. 2-8-2, there having been a corresponding decrease in the other taluks also. This is no doubt partly due to the large extent of dry lands (about 2,616 acres) which has been converted since the last settlement into garden by means of well-irrigation, without any aid from Government water and on which only dry rates have been levied. There has also been a general equalizing of garden rates, all extremely high rates having been reduced; and it is believed, that this liberal policy will tend to stimulate garden cultivation. In the Holalkere Taluk, already an extent of 1,015 acres of dry land has been converted into cocoanut gardens, without any artificial irrigation.

As the revision Survey of the whole of the Chitaldrug District has now been practically complete, the results achieved show that the enhancement in revenue has been moderate. This was one of those districts which suffered most severely from the effects of the dreadful famine of 1876-77. Yet its natural fertility and recuperative power have been so great that in spite of its scanty rainfall, it has not only completely recovered from the effects of the famine but has entered upon a course of continuous prosperity as shown by its increasing population and the increase in the occupied area, while still possessing possibilities of future development. There has been an increase of prices all round of 35 to 40 per cent since last settlement. The facilities for communication have also been vastly improved since then, and the opening of the railway has not only widened the market for its produce but has also helped in the development of its resources. With a view however to enable the tract to reap a full share of benefits which the course of events has brought to it and thereby secure its permanent progress unaffected by bad seasons and other adverse circumstances, the revised rates have as stated already, been adopted with much moderation.

The increase in the number of irrigation wells in the State is not quite so great as would be warranted by their importance, or the facilities which Government give, for their construction by advancing loans. Rs. 30,000 have been set apart for advances for this purpose during the present year also.

Supari halat.

The vexed question of affording relief to supari gardens to which I referred last year may now be said to be reaching a solution. The views of all those well acquainted with this industry have been before Government and an early announcement on the subject may be expected.

Coffee.

The prospects of coffee were slightly better, the prices realized being somewhat higher than have been obtained for some years past. Government have, after careful consideration and consulting experienced opinion, withdrawn the restrictions against cardamom cultivation being carried on within the margin of water courses, and have also reduced the minimum to 5 acres. These concessions will no doubt be highly appreciated by coffee-planters to whom, the question of how to supplement their produce has through the unsteadiness of the coffee market, become important.

Rubber Cultivation.

Government note with satisfaction the endeavours that are made to introduce this cultivation into the State and have been doing their best to encourage the industry by favorable rates of tenure, and help in selecting proper lands in so far as they are not prejudicial to other interests of Government.

An extent of 250 acres has under certain conditions been lately given to Mr. Strickland in the Shimoga District for purposes of experimental cultivation. These experiments in rubber cultivation were first successfully carried on in Bangalore by the Superintendent of the Botanical Gardens.

Agricultural Chemist.

The samples that were analysed by the Agricultural Chemist during the year consisted of a large variety of substances such as sugar-cane, jaggory, coffee, famine foods, fertilizers, etc. Of these 50 are coffee samples which are being analysed to find out the constituent which determines its quality and nearly an equal number of famine foods is being analysed to find out their food value.

Experiments with varieties of sugar-cane with different treatments in cultivation were made and the canes milled and boiled into jaggory of very good quality and colour which has withstood the monsoon effects. Three varieties of sweet potatoes and ground-nuts gave very good yield, out of which cuttings and seeds were distributed and sold to several landowners for cultivation. Experiments with varieties of ratoon crop of sugar-cane, ragi, cotton and castor are being carried on under different treatments. Several of the landowners have visited the experimental plots and seen the working of the improved implements and machines. Among the latter an American Hand Centrifugal and Spraying Pump has given good results.

Insect pests and plant diseases increased during the year. "Kole Roga" of arecanut and "Spike" disease of sandalwood are under investigation by the Cryptogamic Botanist and the Entomologist to the Government of India and the Botanist of the Government of Madras who visited the affected parts last year.

Three students have been working in the Laboratory during the year to undergo a course of training in Agricultural analysis and one of the subordinates has been sent to Poona to study the methods of experimental work carried on in the Government Farm of the Bombay Presidency.

Cattle Census.

A quinquennial census of agricultural stock was taken in September last.

Measures for Agricultural improvement.

In the last year's address reference was made to certain measures calculated to impart a stimulus to agriculture in Mysore. Three such were introduced during the year, and the first was the introduction of the teaching of practical agriculture into the Normal School at Mysore at an annual cost of Rs. 5,132.

A farm bailiff, three ploughmen, and a herdsman under the Agricultural Lecturer, have been sanctioned for the purpose. Arrangements have been already made for acquiring the necessary farm lands, for the sinking of wells therein, for constructing the needful buildings and for the purchase of the requisite implements and machinery. The instruction, accompanied as it would be with actual performance of the cultivator's active duties, will cover the entire range of elementary practical agriculture. Batches of 4 to 5 students will be given an acre of land each on which they will themselves be required to perform every kind of work connected with cultivation. About 80 students will be given, in addition to scholarships, which they draw from the Normal School, a farm allowance of Rs. 3 each a month so as to enable them to take extra nourishment necessitated by the nature of the hard physical work they have daily to turn out. The Agricultural Chemist will inspect the farm occasionally and furnish suggestions for improvement.

Next, a scheme for the introduction of improved methods of cultivation in selected holdings in each taluk, such as may serve to the neighbouring raiyats as examples of model cultivation, was sanctioned during the year, the essential principle of the scheme being the promotion of private enterprise supported and guided by the Government. Every Amildar has to select about half a dozen intelligent holders, one on an average to each hobli, possessing estates of decently fair size and willing to cultivate their lands as model holdings for the year. The Deputy Commissioners will help them in the matter of procuring

good seed, manure, etc., while Dr. Lehmann and Mr. Cameron will be ready to advise them free. Without exercising any undue control over the holders or interfering with the holdings themselves, it is incumbent on the Revenue officers to frequently inspect the areas and to endeavour to sustain the interest of the landowners in these experiments and to rouse it among the neighbouring raiyats. An account of these operations will be kept, so that reliable statistics thereof may be available.

The third measure provides for the holding, in the current year, of a show of agricultural and dairy produce, of local agricultural implements of improved pattern, and of breeds of cattle, at some of the selected District Head-quarters. At these shows, it will be open to the owners of model holdings and others to exhibit their articles and suitable prizes will be awarded by the Government for the best exhibits.

Exemption of Building sites from Ground rent.

Rule 47 of the Revenue Rules was amended so as to annul the authority it contained for the levy of ground rent on agricultural lands appropriated for building sites. The Bombay system on which ours is based provides for the levy of ground rent in such cases. But in Mysore all such sites on which houses are built enjoy exemption. The Government of His Highness the Maharaja considered therefore that much hardship to the agriculturists was inevitable from a partial imposition of such tax only on all lands that might hereafter be diverted from agricultural purposes.

Garden Shraya Rules.

The rules for the grant of lands on shraya for garden cultivation were revised so as to make the terms more liberal and to remove the inelasticity which, to a certain degree, had rendered the former rules inoperative. Where delay is prejudicial, the Deputy Commissioner himself can grant the lands applied for, reserving for settlement the rate of garden assessment imposable. He is empowered to include under these rules lands unoccupied for more than three years preceding the date of application for the land. The grant of still more liberal concessions by Government where deemed necessary in such cases is also provided for.

Payment of Revenue.

Lastly, to afford convenience to the raiyats, Rule 91 of the existing Land Revenue Rules was amended so as to allow of payments of revenue, either in cash or by means of postal order, being made, at the option of the payers, into the treasuries of the taluks in which the lands on which the revenue is due are situated, or, with the special permission of the Deputy Commissioner concerned, into any other taluk treasury in the district or into the District Treasury.

Shekdari Service.

Another measure which I stated as engaging the attention of Government has recently been sanctioned and the improvement in the Shekdari service is expected to be largely helpful to the Land Revenue Administration of the country. The low scale of remuneration prevailing hitherto precluded really competent men from coveting these appointments. Government have now introduced a scheme by which not only have the prospects of shekdars who practically constitute the pivot upon which the Revenue Administration hangs, been considerably improved, but also by prescribing a certain standard of training they will be better qualified to discharge their multitudinous duties. The scheme is to be brought into effect gradually as qualified men become available, and when in full force the maximum additional cost will amount to Rs. 62,520 per annum.

Agricultural Banks.

One of the four Agricultural Banks in the Kolar District, *viz.*, that at Subbanahalli in the Goribidnur Taluk went into liquidation during the year; owing to the fraudulent conduct of the agent and the incapacity or unwillingness of the members to manage the affairs of the Bank, the Government was obliged to order the withdrawal of the loan of Rs. 26,000 granted to the Bank.

A scheme for the recovery by easy instalments of the sum of Rs. 7,52,104 advanced to 59 banks other than the two Coffee Banks has been in operation since 1900-01. The total instalments due under it up to the end of June last was Rs. 2,83,470, out of which a sum of Rs. 2,04,155 was collected.

The working of these banks has been as explained in my former addresses far from satisfactory. The banks are being inspected biennially by officers of local influence, with, however, no appreciable improvement in their general condition on account of the indifference and lethargy of the directors and of the general body of members. The Government had to order after repeated warnings the withdrawal of the sums advanced to five other institutions, *viz.*, those at Satanur, Mudavatta, Kyathasandra, Manchakalkuppe and Malebennur. It was also directed that in each bank a register should be maintained showing the credit of each member based on reliable data obtained after necessary investigation and another register for noting the results of enquiry as to the use made of the loans obtained by the members. Under the scheme sanctioned in November 1902 for making advances to the two coffee banks to enable their members to meet the working expenses of their estates, a sum of Rs. 60,069 was advanced during the year; but the results obtained have by no means been encouraging.

The Government of India have after long consideration and much discussion lately passed a measure known as the Co-operative Credit Societies' Act and have also issued a resolution explaining the considerations that influenced them in framing the various provisions of the enactment and indicating the principles according to which they desire that the Act should be worked. The measure avoids any initiation of the movement on too large a scale and the grant of subventions by Government indiscriminately,—defects, which have as I have more than once said, been fatal to the Agricultural Banks of Mysore. According to the Government of India enactment, in the earlier stages of the rural societies, some limited assistance is to be given but this is not to exceed the total amount of money subscribed and deposited or of share capital paid up by the members, or Rs. 2,000 in any case. The action taken by the Government of India to organize credit places at our disposal wider knowledge and larger experience than singly we should have been able to obtain. It has therefore to be considered whether an enactment to the kind framed by the Government of India may not be adopted for Mysore also. In any case, without the interested sympathy and initiation of the leading men of the country, the movement cannot succeed, and it is for you gentlemen to influence and advise the people to move forward and to benefit by the benevolent intentions of Government.

Technical Education.

You will be interested to know how the scheme of technical training outlined in my address of last year has been carried out. The Engineering School started in July 1903 at Mysore made very satisfactory progress in the first year of its existence. The Mysore Industrial School was re-organized and its work has been improved in every department. It has been recently placed under a Superintendent who did excellent work elsewhere and whose services are also utilized for inspecting the other Industrial Schools in the State. The Melkote Industrial School was able to send excellent specimens of silk and cotton cloths woven in the school to the Madras Exhibition of last December. The Hole-Narsipur weaving institute which has lately been aided made excellent progress in the fly-shuttle hand-loom industry, and its Superintendent was able to invent several mechanical contrivances for warping, sizing and other processes which are suitable for use in small hand-loom factories. At Channapatna a school was opened for the revival of the decaying local manufactures of steel, musical wires, and lacquer work articles for which the town was once famous. A weaving school with carpentry and drawing classes was established at Doddballapur which is reported to be making good progress,

Other weaving schools have lately been opened at Chiknayakanhalli and Molakalmuru. An Industrial School was newly established at Chitaldrug for carpentry, drawing and blacksmiths' work, and a carpentry school was opened in Hole-Narsipur. The Wesleyan Mission has lately appointed an European Superintendent to develop their Industrial School at Tumkur, for which purpose the grant was raised from Rs. 40 to Rs. 165. The old established schools at Kolar and Hassan did good work.

The first batch of five village schoolmasters who were trained in Sericulture in Mr. Tata's Silk Farm have been appointed as Inspectors to visit the villages where silk rearing prevails and help the villagers to breed healthy worms. Two of them have been sent to the Bangalore District, one to Kolar, one to Mysore and one to Tumkur.

A full time drawing master has been appointed in the Mysore Normal School and drawing has been for the present introduced into the F. A. Classes of the Maharaja's College.

Madras Exhibition.

The Mysore Government took part in the Madras Industrial Exhibition and His Highness the Maharaja presided on its opening. The articles of Mysore were exhibited in a separate Court and attracted much attention. A number of medals and prizes were awarded by the Exhibition Committee on account of the excellence of the Mysore exhibits.

Excise.

The main features of the departmental reform are the formation of the taluks of Tarikere and Bagepalli into independent ranges as a relief to the heavy ones of Kadur and Goribidnur respectively, and the placing on a permanent basis of the temporary establishment entertained in connection with the introduction of the tree tax system.

The number of cases of importation and sale of contraband liquor rose from 13 to 43, and it is evident that the traffic in illicit liquors is still going on in spite of persistent efforts to suppress it, indicating that more systematic preventive measures are needed and that the establishment possibly requires strengthening.

The increase of Rs. 72,000 in Excise revenue is due to the rise of 5 per cent in the consumption of arrack on account of the greater prevention of smuggling and of general prosperity in the country. The consumption during the year of arrack was 349,826 gallons, which however was 60,410 gallons less than the average consumption per annum of 410,236 gallons of the quinquennium previous to 1896-97 noticed in my last speech. But the total quantity of country fermented and foreign liquors consumed during the year shows a net decrease of 567,613 gallons as compared with 11,136,620 gallons consumed during 1902

The retail price of ganja was raised from 1 to 2 annas per tola.

Forest.

The area of the State Forests was increased by 82,780 acres or about 13 square miles, the total area now being 1,950 against 454 in 1881 when the Rendition took place. This extent is exclusive of 1,200 square miles of Ghaut Forest and 183 square miles of 'Kan' Forests.

Nine blocks with an aggregate area of 98,000 acres were notified under the Forest Regulation for settlement and 13 blocks with an aggregate area of 86,076 acres were finally settled and notified. About 124 miles of new demarcation lines were cut. Besides 30 miles of preliminary lines and 740 miles of old lines were recleared. An aggregate area of 600 acres was pitted and stocked, besides the vacancies in previous plantings being filled up to a large extent. Cultural operations were carried out over an area of about 11,000 acres.

The area placed under fire conservancy aggregated 1,826 square miles of which 1,658 square miles were successfully protected; the percentage of success was 97·2 against 92·8 in the previous year.

The Forest Surveyors who have been employed for more than 14 years past were found to have turned out very little work. A special survey party was therefore organized late in the year with Mr. Claudius, a retired Topographical Survey officer of the Government of India at its head. The preparation of accurate maps with sufficient topographical details has been ordered to be taken in hand. About 50 square miles in the Begur and Kakankote State Forests were traversed and plane-tabled by this survey party. The old surveyors also traversed about 195 linear miles in the Shimoga and Kolar Districts. With the progress of this survey, the preparation of accurate working plans will be facilitated.

For speedily effecting the numerous forest settlements now pending and also to secure uniformity in them, a provincial settlement officer has recently been appointed, a revenue officer of experience having been advisedly chosen for the place to safeguard the interests of the raiyat population.

The remaining three chapters of the departmental code were passed during the year and the whole code was brought into force from the beginning of the current year. The audit of Forest accounts was transferred to the State Account Department under the Comptroller to the Government.

The realizations under Timber amounted to Rs. 2,55,500, and under Sandalwood Rs. 10,22,900. The revenue derived from other sources was Rs. 2,96,300.

The surplus revenue of the department amounted to Rs. 10,76,000 against Rs. 10,04,000 of the previous year. The gross receipts are again the highest on record. The increase is chiefly attributed to the higher prices realized from sandalwood and larger sales of timber.

A large quantity of dead sandalwood lying in the interior and somewhat inaccessible places was collected during the year owing to the increased attention paid to its collection. The quantity thus collected is steadily on the increase and there is no danger therefore of the supply in future being materially diminished by growing trees being overworked. The prevalence of Spike disease which has been discovered in parts of the Mysore District has been a cause of concern to Government. The affected tracts were traversed by a special party and all diseased trees uprooted. The subject as I have already said is under scientific investigation.

The demand for timber being hitherto almost purely local and some of our best forests being far away from the railway stations, which added considerably to transport charges, there used to remain a large quantity of timber annually unsold and the prices realised were not quite so good as the quality of timber demanded. In the Kolar Gold Field, a considerable local market has been found for the surplus timber through the medium of Mr. Haji Ismail Sait who has offered fair terms and whose interest it is to exploit the market to the fullest extent. This supply consists of those species of wood which were hitherto not much worked and they thus give relief to teak, honne and one or two other kinds.

The scope existing for further extension of forests is under investigation. In this connection, gentlemen, you are aware that Government have introduced a series of rules with special reference to the agricultural classes giving them several privileges and have always been ready to take into consideration any circumstances which may call for exceptional treatment. I trust, therefore, I shall not be appealing to you in vain to secure the co-operation of every one to preserve the forests without detriment to their recuperative capabilities.

Geological Department

During the year, revised rules for the grant of mining leases and exploring and prospecting licenses in Mysore were issued.

The renewal of the leases to the older companies to which the Government had in a way been committed from 1888 took place as you know in December 1901 Representations had been made on more occasions than one that the companies required additional working capital, which capitalists declined to supply until they

were assured of the terms of the renewal of the leases, and that therefore the progress of the industry was being much checked.

Sir K. Sheshadri Iyer had at first offered a sliding scale of royalty varying from 2 to 12 per cent graduated according to the quantity of gold produced, but he abandoned it, as such a scale, in his opinion, and rightly also, when based on net profits was likely to lead to differences of opinion between the Government and the companies, and when based on declared dividends might lead to manipulation of the capital. He subsequently proposed another sliding scale based upon an assumed constant relation between the gold produced and net profits. The Government of India found that they could not accept the proposition that net profits increased with the increase of gold production in a fairly regular manner and they also considered that the proposed sliding scale had a tendency to place an unreasonable burden upon such companies as might after many vicissitudes and great outlay be able to develop their mines to some pitch of productiveness and prosperity. They therefore recommended for acceptance the following scheme proposed by Mr. LeMarchant, a member of the India Council :—

(*a*) to maintain the existing royalty on gross profits ;

(*b*) to maintain the 5 per cent rate of that royalty as a maximum, but to graduate it downwards, so as to press less heavily on mines with a low average of returns ; and

(*c*) to impose a charge of about 2½ per cent. on dividends with exemption or abatement for companies whose dividends were below some fixed sum, such as £ 25,000 a year.

It looked as if this scheme of the Government of India was largely influenced by considerations relating to the then pending renewals of the Kolar leases and by apprehensions lest any revised scheme for levying royalty on future leases might be made to apply also to the renewed leases of a few rich properties on the Kolar Gold Field. It was therefore deemed expedient to keep the two questions apart, the one involving a declaration of general policy, and the other being a matter of negotiation and mutual agreement. On the Hon'ble Mark Napier arriving in India in December 1901, negotiations were opened with him, and on behalf of the Mining Companies he offered 5 per cent on net proceeds and one per cent on dividends. The ultimate results of the negotiations were however that more profitable terms were obtained and the Kolar leases were renewed with effect from 22nd March 1910, on which date the earliest

lease was to expire, for a period of 30 years, the rate of royalty being 5 per cent on the gross output and in addition 2½ per cent on all dividends.

This prior settlement of the Kolar leases facilitated the early issue of the revised Prospecting and Mining Rules in supersession of those issued in 1898. The very uncertain character of the enterprise needed a large margin of profits to be left to the Mining Companies. It was also necessary that the terms to be imposed should bear as lightly as possible on companies which were starting operations and as much as possible of the money subscribed should be left free for conducting development work. The levy of a fine on assignment or under-lease sometimes led to an irksome scrutiny of the transaction between the lessee and his assignees, besides very probably, if carried out in its entirety necessitating the acceptance by the Government of paid-up shares as part payment of the fine. The creation of joint interest on the part of Government was of questionable propriety and often resulted in losses. Accordingly, in April 1902, a new scheme was proposed the principal features of which were—

(1) the encouragement of the mining industry in its earlier stages by the abolition of all royalty so long as the work was not profitable;

(2) the simple and easily levied tax of 5 per cent on the gross value of the product; and

(3) in the case of the more successful mines, an additional tax of 5 per cent of any net profit in excess of £ 25,000 per annum.

This scheme which secured the approval of the Government of India has the merit of treating new and struggling concerns with liberality, while at the same time safe-guarding the revenue interests of the State in the event of the industry, as a whole, proving decidedly successful. Various other improvements were also effected in the new scheme. Formerly a licensee could take up not more than 10 square miles for prospecting and was required to pay a fixed fee of Rs. 500. In the new rules the area is not limited except by the discretion of Government and the fees consist of a deposit of not less than Rs. 100, and a rent of Rs. 50 per square mile. The length of the mining block from end to end in any direction has been reduced from two miles to one mile. The prospecting licensee has been given six months in which to start operations instead of one month as under the old rules. During the past twenty years the levy of land revenue assessment on mining blocks had given rise to much trouble and correspondence, and ultimately resulted in the major portion of it being remitted. It had caused great delays in granting leases and had created confusion in the village accounts. A uniform rate of one rupee per acre was therefore substituted in

place of the assessment fixed by the Settlement Department.

The number of mines actually at work at the end of the year was 13 as against 11 in June 1903, the increase being due to the start of development operations on the Ballara Block in the Tumkur District and on the Bodimardi Block in the Chitaldrug District.

The total quantity of bar gold produced in all the mines during the official year was 612,777 ozs. of the value of Rs. 350,32,866, as against 576,837 ozs. of the value of Rs. 330,21,817. The total amount of royalty due to Government for the year 1903-04 was Rs. 17,51,643 as against Rs. 16,51,090 for the year 1902-03, being an increase of Rs. 1,00,553.

Owing to the rapid increase in the work of inspection of mines an additional Inspector was, as you are already aware, appointed last year. The need for a further increase to the staff has been urged upon the Government.

A set of rules was prescribed for the guidance of engine-men and boiler attendants in mines and certain additional rules were also issued under the Mysore Mines Regulation to provide for the safety and discipline of coolies working underground in mines.

The Geological Survey was carried on in the Tumkur and Chitaldrug Districts and resulted in the discovery and mapping of an entirely new belt of schists extending along the eastern side of the Chitaldrug belt for a distance of 60 miles with a maximum width of 8 miles, the rocks of which are in many respects similar to those of the Kolar Gold Field.

In the Shimoga District an area of 570 square miles was geologically surveyed and several promising outcrops of manganese ores were located in the jungles on the Shankargudda Range, south of Aiyanur.

Public Works Department.

The total expenditure incurred on works of all descriptions during the year 1903-04, amounted to Rs. 59,62,671, inclusive of the English payment of Rs. 3,67,604 made on account of the second Installation of the Cauvery Power Scheme. Of this amount Rs. 1,80,000 was out of the Civil List.

The restoration of the breached tanks in Kolar, on which a large revenue is dependent, was promptly undertaken, and they were repaired so as to store water for this year's crops.

As in previous years, the progress made on the Marikanave works was very satisfactory. A revised estimate was sanctioned for Rs. 44,67,211 including the cost of the two irrigation channels and head works. The dam was raised from R. L. 86·75 to R. L. 109·40, or by 22·65

feet. Half the length of the subsidiary anikat for the channels was raised six feet above the river-bed, and considerable progress was made in the excavation of the channels. During the flood season of 1903, there was a maximum discharge of 2½ feet over the temporary weir which had been fixed at R. L. 80·00. There were 19,833 units stored in the reservoir at the end of June 1904.

The construction of the new Chikdevarayasagar anikat was sanctioned at an estimated cost of Rs. 1,03,319 and a good start was made during the working season of the year.

Good progress was secured on the following more important works:—the restoration of the Madore tank above the Hessarghatta tank in the Bangalore District; of the Chillapalli, Holali Somambudi Agrahara and Chendandur tanks in the Kolar District; of the Agrahara tank, of the Kittur anikat and channels in the Hassan District; and the construction of the Mavatur new tank in the Tumkur District and of the new Kalhalli, Chikmadore and Ranikere tanks in the Chitaldrug District. Her Highness the Maharani, late regent, graciously consented to the popular desire to this last tank being named after her.

The works noted below are reported to have been practically completed during the year. The improvement of the irrigation channel of the Ramsagara tank, and the opening out of the right bank channel from the Ramasamudram new tank in the Kolar District, the restoration of the Kyathagankere tank in the Tumkur District and the construction of the new aqueduct on the Chikdevarayasagar channel in the Mysore District.

I referred in my last speech to the preparation of a number of famine protective projects. The Engineer on special duty, completed 17 projects during the year, estimated to cost Rs. 59,03,708; of these, 5 projects, *viz.*, tank near Bidadi across an affluent of Vrishabhavati, at Gudigekunte across Sukkehalla in the Jagalur Taluk, and near Hunsur across the Vodli, opening out left irrigation channel from Kudlur anikat, and extending south channel from Sriramadevaru dam, aggregating Rs. 6,06,680, have been sanctioned and the remainder are still under consideration. The preparation of these projects having approached completion, serial maps and tank registers, the necessity for which had long been felt but to prepare which no systematic efforts had been made, were taken in hand. These were practically completed in the rough for all tanks in the Arkavati and the South Pennar Basins. In the North Pennar Basin, preliminary registers for tanks in the Nelamangala Taluk were completed. In the Shimsha Basin, most of the tanks

have been inspected, and information as to capacities, atchkat, revenue and other particulars obtained.

Civil Works—Civil Buildings.

Under Civil Buildings, the principal works in hand during the year were—improvement and additions to the Victoria Hospital at Bangalore; the construction of the new hospital and quarters for medical officers at the Kolar Gold Fields; the re-construction of the Palace at Mysore, and the construction of a Durbar Hall in the Fern Hill Palace at Ootacamund.

Communications.

Under Communications, the following works were practically completed—the widening of the Ooregum Gold Fields Railway feeder; the opening out of the Balaghat-Marikuppam new loop road; the metalling of the Gundlupet-Sultan's Battery road; the construction of bridges in the Hiriyur-Marikanave road, and on the Ananthapur-Tirthahalli roads. Considerable progress was made in the following works—the opening out of the remaining sections of the Hanbal Devarunda and the Saklespur-Gonibid roads, the improvement of the Bisle ghat on the Sukravarasante-Subramanya road; the construction of the bridges over the Lokapavani river at Honakere on the French Rocks Station-Nelligere road; the bridges over the Amblekehalla Stream on the Tarikere-Mangalore road; the bridge over the Hemavati at Anjur on the Anemahal-Mudgere road; and the re-construction of the damaged bridge across the Palar river on the Kolar-Venkatagirikote road.

The Gold Fields Water-supply Project, which was commenced during the previous year on an estimate of 11 lakhs was practically completed; and had it not been for the breaching of the Betamangala tank, the water service to the Gold Fields could have been given during the year. This year the water service will be commenced as soon as the tank fills to the required extent.

The Chamarajendra Reservoir and the Kakol tank immediately above it sustained considerable damage from the floods in November last; but the re-construction of the damaged weirs and other improvements sanctioned have all been completed most satisfactorily and promptly.

The drainage scheme for the Malleswaram extension in Bangalore was sanctioned and some progress was made. The old standing question as to the incidence of the annual maintenance charges of the Chamarajendra Water Works was definitely settled during the year, the entire actual proceeds of the revenue from water tax and tolls only, being assigned from the Municipal Funds for the purpose and the balance required being borne by the State.

The Second Installation for an additional 2,000 Horse Power at the Cauvery Falls applied for by the

Gold Fields progressed rapidly. The outlay on this work during the year was Rs. 6,44,968 against the sanctioned estimate of Rs. 13,10,000. All new buildings were ready and nearly all the plant were brought to site.

Sanction was lately given at an estimated cost of six lakhs of rupees to the scheme for the electric lighting of the Bangalore City and of the Civil and Military Station, and for the supply of reserve power for industrial purposes from surplus power available after supplying the demands at the Gold Fields. This work was started and the survey of the transmission line into Bangalore was completed; the required buildings are ready to receive the apparatus when it arrives.

In view of the efficient conservancy of the existing channels and their extension and improvement, a new Channel Division has been recently constituted.

The Tank Committee appointed some time ago having completed their deliberations and sent up a report, action was thereupon taken and I may now sketch to you the policy of Government in this direction. It has been found that the rules of 1873 regarding the liability of raiyats to do earth-work to the tanks require hardly any alteration. An addition has been made to Rule 3 that for purposes of fixing the proportion of work to be done, one rupee of the dry or mohatarfa assessment is to be regarded as one-third of a rupee of wet and garden assessment. In order to give legal effect to what is now enforced as a custom with regard to contributions of labor, a Regulation is intended to be passed. The Inamdar's liability to maintain river channels has been defined as not to exceed that of the revenue paying raiyats and this liability will accordingly be restricted only to the removing of weeds and will not extend to silt clearing. The arrears of cost due from them on account of the maintenance undertaken by Government will be remitted.

The next important subject is the restoration and maintenance of what are called minor tanks. At present a distinction is maintained between tanks paying Rs. 300 and under and those paying Rs. 100 and under. For the latter Government was hitherto incurring no expenditure, while for the former it undertook the masonry and stone-work provided the raiyats did the earth-work. Hereafter this distinction will be abolished and all masonry and stone-work will be done by Government under the condition specified. In special cases, however, when the amount of earth-work imposes an unreasonable burden on the raiyats or exceeds the proportion of two to three, discretion is given to the Deputy Commissioner to allow some relaxation. In cases of hardship loans will also

be advanced to raiyats by Government to be recovered from them in easy instalments. For the restoration of minor tanks on the lines indicated by me, His Highness the Maharaja has been pleased to sanction a special grant of a lakh of rupees for the current year. Unless the District and other local officers bestir themselves and earnestly give practical effect to these measures no real improvement can be effected. It is hoped that the people also will accord their full co-operation in preserving from deterioration our great heritage of tanks, the usefulness of which cannot be overrated.

Railways.

The percentage of net earnings to capital outlay on the Railways works out as follows:—

	1902-03.	1903-04.
Mysore-Harihar	3·62	3·74
Bangalore-Hindupur	3·50	4·88
Mysore-Nanjangud	1·79	2·21
Birur-Shimoga	0·95	1·10
Kolar Gold Fields Railway	6·73	6·96

The percentages of working expenses to gross earnings were 60·80 during the year as compared with 63·77 in 1902-03.

A preliminary report with an abstract estimate for constructing the Bangalore-Chikballapur Light Railway has been received from that Railway Company. It is a good work undertaken by a local company and deserves encouragement. The matter is under reference to the Government of India.

Legislation.

The following were the principal Regulations passed during the year:—

(1) *II of 1903.*—This is nothing more than a measure to give formal effect to the provision contained in Article 24 of the Memorandum of Association to levy the unpaid balance due to Government as arrears of revenue.

(2) *III of 1903.*—This Regulation gives legal form and provides proper administrative machinery for carrying out the sanitary improvements to the Mysore City, which I sketched in my address of last year. A Trust Board has been created under it with special powers to administer the funds placed at their disposal and generally to carry out the necessary works of improvement. The Board has been advisedly made to include of some leading non-official members to secure the sympathy of the people.

In the course of the execution of these improvements, it was found necessary to abate overcrowding of houses and Regulation IV of 1904 provides for this purpose.

The Penal Code and the Criminal Procedure Code were on the legislative anvil for several years past and it is a matter of satisfaction that they were passed during the year. Several desirable modifications and improvements have been introduced and the law as contained in these

Regulations is up to date and is on a par with the British Indian Law.

Two other Regulations that were passed were the amendment of the Chief Court Regulation and the Whipping Regulation.

Rules under the Local Boards Regulation were published in September 1903. There are at present constituted under the new Regulation eight District Boards, one in each district, 77 Taluk Boards, one in each taluk or sub-taluk and 38 Unions. All these Unions were formerly minor municipalities and they were converted into Unions, as they contained a population of less than 3,000 each. There were a number of Draft Regulations and Rules under consideration at the end of the year, and of considerable importance and interest, and of these, the Mysore Municipal and the Police Regulations may be specially mentioned. The first Regulation is ready to be issued and awaits the approval of the Government of India. Its distinctive features are that in the first place, it replaces the Municipal Law that is in force in the cities of Mysore and Bangalore, and that has proved unsuitable to their growing needs. Secondly, it provides the various minor municipalities in the State with a law that clearly defines their duties and powers, recognizes their legal existence as corporations, renders them efficient factors in the administration of sanitary matters and, above all, leads to such a constitution of the Boards as ensures the non-official members taking a sufficiently active interest and part in the discharge of Municipal duties. When this legislative measure is sanctioned it may well be looked upon as a land mark in the history of Municipal Administration. It supplies a want which has been felt and the remedy for which has been under consideration for more than two decades.

The Police Draft Regulation is being revised by a special committee of experienced officers and will be soon taken up for consideration by Government.

Judicial.

In civil cases, the total number of original suits and small causes filed was respectively 10,190 and 8,567 during the year as against 10,919 and 7,613 in 1902-03, with an increased total percentage of 1·21. The total number disposed of during the year was 18,901 which was 377 more than the number of the previous year and 144 more than the number filed during the year. The number pending at the end of the year was 6,050 as compared with 6,194 in the previous year.

The number of regular appeals including second appeals filed was 1,260 against 1,166. The number disposed of was 1,186 against 1,044, and the number pending was 1,691 against 1,617 of the previous year showing an increase of 74.

A new Munsiff's Court was established at the Kolar Gold Field, with jurisdiction over the taluks of Malur, Bowringpet and Mulbagal, these taluks being removed from the jurisdiction of the Kolar Munsiff.

The number of heinous and ordinary offences and the number of persons involved were 11,009 and 22,638 respectively as against 13,375 and 27,692 in 1902-03, showing a decreased percentage of 17·68 in offences and 18·25 in the number of persons.

Police.

The number of cognizable cases reported during the year was 5,211 or 871 less than that of the previous year. The resident criminal gangs were as usual watched by the Village Police in conjunction with the Regular Police. Some gangs in the Bangalore District and about 100 families in the Chitaldrug District were exempted from the operation of the gang rules, as they had taken to peaceful avocations as farm laborers and agriculturists. The time seems now to have come for attempting a systematic colonization of these criminal tribes by settling them on some large areas of cultivable land wherever available in Mysore. The practical aspects of the question however require careful consideration and it is intended to take up this question shortly.

Registration.

A scheme for the reorganization of the Department and for providing better prospects of pay to the special Sub-Registrars and the opening of special Sub-Registry offices at Shikarpur, Nagar, Sorab and Alur were sanctioned at an additional maximum cost of Rs. 8,220 per annum. To secure efficient inspection, the services of Assistant Commissioners have been utilized as Inspectors of Registration Offices.

Education.

The percentage of both boys and girls at school to the total population of school-going age showed a slight decline of ·87, but it has been found that the decline is not due to any permanent causes.

Three Mahomedan students passed the newly established Moulvis' Examination for the first time during the year.

The question of the extension and improvement of primary education engaged the serious attention of Government during the year also. In my last address, I mentioned to you that in order to increase the educational funds, the grant from the Local Funds General had been raised from 25 to 33 per cent. At the same time the village school fund was relieved of the charges of Normal Schools and other institutions to the extent of about Rs. 30,000. Another step taken to obtain larger receipts for this purpose was the revision of the rates of fees levied in schools and colleges. This subject which was under consideration from

1895, demanded a pressing solution. The scale of pay for the Lower Secondary and Primary teachers, which was fixed more than 30 years ago, was found inadequate for their present needs on account of the increase in the prices of articles of food, and that to provide funds for increasing their pay, if for no other reason, it was necessary to levy adequate fees in Lower Secondary and Primary Schools. After much consultation and anxious consideration, the Government decided to introduce a new scale of fees from January last. In the F. A. and B. A. Classes of Colleges, the rates were raised by a rupee each and in the High School Classes by half a rupee. There was an increase of four annas in the Lower Secondary Classes. In the Taluk Vernacular Schools the increase was only by one anna in each class and for the first time, a fee of one anna and two annas were ordered to be levied in the Upper Primary and Middle School Classes of village schools. In every case the fees are to be levied by the month only instead of by half-yearly terms. In the case of the village schools, the levy is only above the Lower Primary Standard up to which the instruction is free. It is too early to gauge the effect of this increase but the measure, however, has the advantage of affording scope for private enterprise which is at present extremely backward, to start schools with the help of a grant-in-aid from Government.

The Inspecting staff requires to be placed on a better footing and the matter requires early consideration.

Muzrai.

The endowments of six temples at Salagami and five other places, which had been resumed during the Inam Settlement on account of their dilapidated condition were restored during the year, as the Institutions were reported to have been since thoroughly repaired and puja revived therein.

For many years past, there had been no satisfactory auditing of Muzrai accounts in the Comptroller's office, the results being that the correct balances in favor of Institutions were not readily ascertainable; and the figures of the District Treasuries were found not in accord with those of the Comptroller's office. These and several other defects connected with the audit of accounts have been set right and suitable measures sanctioned to ensure an efficient check in the Muzrai Secretariat and a satisfactory audit in the Comptroller's office.

Medical and Sanitary.

The total number of patients treated in the several hospitals and dispensaries was 1,131,250 against 993,176. There were in Mysore at the end of the year a total number of 136 hospitals and dispensaries giving an average of one to a population of 41,032 and an area of 205 square miles. The average number of patients treated was 8,379 for every institution.

The total number of births during the year was 84,626 as against 95,155 in the preceding year; and that of deaths was 120,918 as against 109,496. The average ratio of births per mille of the population in Mysore is 18·53 and that of deaths 17·12.

Under cholera, small-pox and plague, the number of deaths underwent a considerable diminution. There were only 121 deaths from cholera against 202 of the previous year and 1,261 deaths from small-pox against 4,216. The number of deaths from fever rose from 44,879 to 52,384, which was only less than the highest figures of 58,907 in 1897-98. There is no doubt that in Mysore fever is the cause of great mortality, the averages for the past two quinquennium being 44,053 and 43,300 respectively. The number of plague attacks and deaths was 26,893 against 36,088 and 20,014 against 26,573 respectively. The diminution in attacks was more than 9,000 while that in deaths was more than 6,000, giving a diminished percentage of ·17 and ·12 respectively to the total population as compared with the previous year.

The people of Mysore both in rural parts as well as cities have now become so used, as you know, to the course of plague that on the first symptoms of an outbreak or reappearance of it, they feel no panic but voluntarily evacuate the infected places and live in sheds outside, in numerous instances constructed at their own cost. The next efficacious remedy, *viz.*, disinfection, is everywhere resorted to, but it is by the comparatively cheap method of desiccation and white-washing instead of by costly chemicals as was the case in the early years of the outbreak, which experience has shown to be impracticable. In 1899-1900 which is the first full year when plague measures were in complete operation, the expenditure amounted to the large sum of more than 4½ lakhs, and an analysis of the figures shows that no less a sum than 1¼ lakhs was spent in the maintenance of large establishments for purposes of direction and supervision. With increased knowledge and ready adoption on the part of the people of precautionary and remedial measures combined with the experience and familiarity gained by the officials also in dealing with the malady, it became possible to effect large savings in the salaries and allowances given formerly and to transfer a large portion of this work to the permanent establishment. The expenditure has thus naturally decreased, and the present amount is ¾ lakh under these heads. For the same reason, there has been a large saving of more than four-fifths of the amount in the expenditure incurred in providing segregation camps, some of which have been constructed as permanent structures, as people merely ask at present for the supply of shed materials, which are given free to the poor and at concession rates to others. The resort to disinfection by

desiccation and lime-washing for all ordinary mud houses and the use of chemicals only for brick-built houses has reduced the expenditure on this account by nearly a half, while the cost of the examination of railway passengers which was a large item in the earlier years shows considerable diminution. In these ways, the plague expenditure in 1903-04 amounted to Rs. 1,15,000, of which about Rs. 12,000 was spent on the demolition of houses and other sanitary improvements in rural parts.

This amount, however, does not represent the whole of the expenditure on sanitary improvements. The total amount provided for expenditure from District Funds on wells, drains, village conservancy, filling in insanitary pits, sanitation on occasions of jatras and other festive gatherings, construction of latrines, and removal of prickly pear and other works was about Rs. 74,000. The moffusil municipalities executed sanitary works costing about Rs. 75,000, of which about Rs. 53,000 was for drains about Rs. 12,000 for improvement of water-supply and the rest on Miscellaneous Public Works. The Government also granted out of the Local Funds General about Rs. 44,000 for wells, water-supply and other sanitary improvements. The expenditure from State Funds on sanitary works undertaken by the Public Works Department, such as the repair and maintenance of water-supply reservoirs, drainage, new extensions and roads, etc., amounted to more than 1¾ lakhs. The total amount thus spent on sanitary improvements in places outside the cities of Mysore and Bangalore amounted to about four lakhs.

As you are already aware, an annual sum of three lakhs is allotted for the improvement of the Mysore City out of which Rs. 1,12,000 was spent by the Trust Board and His Highness the Maharaja has also been graciously pleased to sanction an annual grant of a lakh of rupees for the next five years for a similar purpose for the Bangalore City. These municipalities have also been exonerated from the payment of loans due to the State amounting to nearly 2½ lakhs of rupees mainly incurred on account of sanitary improvements. The long pending question of the adjustment of the annual working expenses of the Bangalore City Chamarajendra Water-works amounting to about 3½ lakhs to the end of 1902-03 was also decided in a manner most favorable to the municipality by Government waiving their claim to the amount so that the resources thus set free might be utilized for more improvements. A sum of Rs. 50,000 was also spent by Government in Bangalore and Mysore on drainage and water-supply. Recently a sum of Rs. 30,000 was granted for the improvement of the Shimoga town.

While I believe, it may under the circumstances mentioned by me, be presumed that we have not

been wanting in earnest efforts to struggle with this disease I cannot help calling your attention to the fact that the disease is in its seventh year in India and as described by His Excellency Lord Curzon is "defying analysis, defeating the utmost efforts of medical skill and administrative energy, inscrutable in origin, merciless in its ravages, sweeping off very often thousands in a day and tens of thousands in a week." It will not do to slacken our vigilance in any way. In Bombay for instance, where the utmost efforts have been made to stamp out this dreadful malady, there was an increase both in the number of attacks and deaths, the percentages being ·12 and ·18 respectively to the population. While the average rate of death in Mysore from plague was 2·46 per mille of the population, in Bombay it was 4·19. In Madras also the number of attacks and deaths has been increasing from year to year during the past five years in spite of all the efforts made to keep out the enemy. I appeal to you, gentlemen, as the representatives of the people and as persons possessing local influence to give your fullest co-operation and counsel and persuade each and every individual within the sphere of your influence put for his or her best exertion to erradicate this dire disease which has become a common enemy to the whole Indian population, and the ravages of which sometimes grow alarmingly in extent in spite of all preventive efforts till now, on the part of the several Governments in India.

While on this subject, I may mention that Mr. Bhore, one of our Assistant Engineers, has been deputed to England to make a special study of Sanitary Engineering as prevailing in Europe.

Conclusion.

Such, gentlemen, is a summary of the main events of the second year of His Highness' Administration. The number of cases that engaged the attention of His Highness amounted to more than 1,100 showing an increase of more than 370 over that of last year and this beneficent exercise of His Highness' personality over all the important business of the State affords a tangible proof of His Highness' great interest in the welfare of his subjects. It is difficult to calculate the extent of obligation under which the Administration is placed to His Highness' inspiring example. The extent of the hold, which His Highness and the Members of the ruling family have established on the affection of the people of Mysore received, as you know a signal confirmation on the occasion of the recent illness of the Yuvaraja, when every heart in Mysore turned with the keenest anxiety to his sick bed at Ajmere, and when under the blessings of God he was restored to health, greeted his return to this country with an unique outburst of joy and with festive demonstration.

P. N. KRISHNA MURTI,
Dewan of Mysore.

* The net decrease of Rs. 23,123 is due chiefly to less expenditure under temporary and permanent remuneration to Village Officers [Rs. 14,154] and under miscellaneous [Rs. 12,706] on account of the non-recurrence of an abnormal charge in previous year on account of compensation for land taken up for revenue purposes. There were also slight increases under other heads amounting in all to Rs. 3,745.

a The increase was chiefly under conservancy and works. There was however a slight decrease under establishment.

b The decrease of Rs. 15,007 was due chiefly to the abolition during the year of the appointment of one of the Councillors [Rs. 11,502] and to the savings which occurred in the General and Revenue Secretariat [Rs. 4,086] in the pay of the Tutor and Governor to His Highness the Maharaja less than that of the Private Secretary to His Highness [Rs. 9,107], in the Agricultural Banks establishment [Rs. 6,946] and also under other items [560]. There was however increase under Revenue Commissioner due to the appointment of a separate officer for that office [Rs. 14,798], and also under Scholarships [Rs. 2,196] on account of fresh scholarships sanctioned.

c Under this there was a decrease of Rs. 7,000 in the pay of the Judges of the Chief Court, due chiefly to the retirement of Mr. Best and to the appointment of another Chief Judge on less pay, and also under Land Revenue charges debitable to this head to the extent of Rs. 7,545. There was however a considerable increase under Sub-Judges' Courts [Rs. 21,253] due to the formation of three new Courts which together with small excesses under other items resulted in a net excess of Rs. 3,326.

d There were decreases under Jail Superintendents' establishments and Jail dietary charges both of which were due to the abolition of the Shimoga Jail, Lock-up dietary charges and purchase of raw materials for Jail manufacture. Small increases under other items amounting to Rs. 702, reduced the decrease to Rs. 10,429.

e There were decreases under Town and Executive Rural Police both due to savings under establishment charges and under Kolar Gold Field Police due chiefly to the buildings in previous years having been completed.

f This is due to the increases in the establishments under Direction and Inspection and to the transfer of the Normal Schools to this head from Village School Fund.

g Decrease due to the cost of construction and repair of Muzrai buildings, being less during the year.

h The increase is due to the transfer to this head of the charges on account of Local Fund Dispensaries and to the increase of Rs. 32,712 in the cost of Europe medicines purchased. There was also a saving in the pay of the Senior Surgeon owing to the transfer of Dr. Benson to the British Service.

i Increase chiefly due to renewal of carriages and horses, the entertainment of guests and purchase of bungalows and grounds for Government being adjustment of the outstanding balance of advance for Glenview House.

j Decrease due to less expenditure under Census, and to there having been no charges under Library and Laboratory of the Geological Department.

k Increase was chiefly under pensions probably due to arrear payments.

l Increase due chiefly to larger purchases of printing materials and Europe Stationery and slight increase in the Gazette and Press establishment.

m Decreases due chiefly to non-recurrence of charges connected with the Installation, Delhi Camp, etc.

n The increase was due to about nine lakhs spent on the Kolar Gold Fields, Water-supply project and the restoration of the Bethamangala and Hessarghatta tanks, and to about three lakhs charged to Provincial expenditure on account of arrears of maintenance charges of the Chamarajendra Water-works payable by the Bangalore City Municipality.

o Decrease due to the charges for buildings on account of the Imperial Transport Corps being transferred to the Public Works books. There were savings under both the Imperial and Local Service Regiments, the Kunigal Stud Farm and Miscellaneous charges, while there were corresponding increases under Barr, Military Stores, superannuation and retired allowances and Palace Military establishment.

p The decrease is due to almost the whole of the debentures of the Mysore Railway Loan of 1882 having been discharged.

q This is due to increase in deposits.

r This is due to increased interest realized on the balance at credit of the Life Insurance Fund which rose from Rs. 9,11,102 to Rs. 9,97,255 during the year.

s This decrease is due to the adjustment of only ten months interest as against eleven of the previous year.

t The whole of the expenditure was due to the Second Installation, the First Installation having been completed last year.

I. Read the District Fund Administration Report for 1903-04 with the prescribed statements prepared in the President's office in accordance with Government Proceedings No. 3366-75—L. F. 105-03, dated 5th March 1904.

Resolution.—Resolved that the report be passed and submitted to Government.

II. Read Hassan Division Executive Engineer's docket No. 355, dated 26—30th August 1904, proposing that the old Police Station at Halebid, Belur Taluk, may be taken up as a musafirkhana for the accommodation of travellers.

Resolution—Resolved that a reference be made to the Assistant Superintendent of Police, Hassan District, enquiring if there is any objection to the building in question being handed over to the District Board in view to the same being repaired and set apart as a musafirkhana for the use of travellers visiting Halebid.

III. Read the resolution of the Hassan District Board at their meeting held on 12th August 1904, on the subject of establishing a Vaidyasala or a regular dispensary at Grama in the Hassan Taluk.

Read also the resolution of the Union Panchayat of Grama and of the Hassan Taluk Board on the same subject.

Resolution.—Resolved that an Indigenous Hospital (Vaidyasala) be established at Grama since Provincial Funds are not available to defray the greater cost of a regular dispensary there as suggested in the resolution of the Union Panchayat read above.

IV. Read again para 6 of Government Proceedings No. 773-8—L. B. 6-04, dated 29th July 1904, regarding the omission of the Bharatavalli-Alur loop road among the roads for which increases in mileage allotments were proposed by the Finance Committee and approved of by the District Board at their meeting held on 4th June 1904.

Read also the resolution dated 24th September 1904 of the Finance Committee, stating that the Bharatavalli-Alur loop road was omitted by oversight in their report which accompanied the District Fund budget estimates, and recommending that the increased allotment for the road may be passed.

Resolution.—Resolved that the increase of mileage allotment for the Bharatavalli-Alur loop road be approved.

V. Read the correspondence connected with certain estimates for works to be executed from District Funds.

Resolution.—Resolved that estimates for the following works be sanctioned for the current year for amounts not exceeding those noted against each :—

Name of work.	*Amount of estimate.*
	Rs.
1. Sinking a well at Hanbal, Manjarabad Taluk	458
2. Flooring the cattle-pound at Belagode, Manjarabad Taluk, with slabs ..	149
3. Whitewashing the musafirkhana at Palya, Alur Sub-Taluk ...	9
4. Repairing the musafirkhana at Channarayapatna	249
5. Repairing the toll-house at the Hole-Narsipur bridge	191
6. Sinking a well at Hirahalli-Koppal, Hole-Narsipur Taluk	360

VI. Read correspondence ending with Saklespur Sub-Division Officer's yadi No. 781, dated 30th March 1904, regarding an estimate amounting to Rs. 706 for sinking a well in Yeslurpet especially as one Appanna Chetty has deposited a contribution of Rs. 200 towards the work and a well is very necessary for the use of the inhabitants in the proposed locality of Yeslurpet which is a large place.

Resolution.—Resolved that the estimate be submitted for sanction of Government.

VII. Read correspondence ending with yadi No. 170, dated 18th July 1904, from the General Assistant Commissioner, Hassan District, requesting orders to carry out the work of constructing a new culvert on Halli Mysore-Gubbi road during the current year.

Resolution.—Resolved that the execution of the work be deferred as it does not now appear that District Funds will suffice to meet the cost of that work in addition to more important works.

VIII. Read Secretary's docket No. 2271-116-2—L. B., dated 19th September 1904, pointing out that para 138 of the Rules under the Local Boards Regulation empowers the District Board and not the Presidents to sanction works costing Rs. 500 and under.

Resolution.—Recorded.

IX. Read Hole-Narsipur Taluk Amildar's report No. 98, dated 21st September 1904, stating that the notice of the District Board meeting could not be served on Mr. Venkataramaiya, Pleader, as he was absent from Hole-Narsipur.

Resolution.—Recorded.

X. The members of the Board were informed that the Proceedings of the Mysore Dasara Representative Assembly will commence on 21st October 1904, instead of on 22nd October 1904 as originally fixed.

XI. *Resolved* that the next meeting of the Board be held at 3 P. M. on Monday the 14th November 1904.

II. Read the Administration Report and Accounts for the year 1903-04.

Resolution.—The report will be adopted and submitted to Government.

III. Read Government Proceedings No. 1868-76—L. F. 42-92, dated 2nd instant, directing that as it is undesirable that the ordinary repairs to 3rd class travellers' bungalows should be carried out by one agency and special repairs by another, the present practice be continued, by which all the repairs to such bungalows are done by the Public Works Department.

Resolution.—Recorded.

IV. Read Government Proceedings No. 1974-6-13-2—L. B., directing the levy of rent from Mr. Humza Hussein, Sub-Judge, for the period he occupied the musafirkhana at Chitaldrug.

Resolution.—Recorded.

V. Read Executive Engineer's docket No. 830, dated 9th instant, stating that the cost of repairing the road from Yekkegondi to Nandagavi in Harihar Sub-Taluk is estimated at Rs. 10,000, and enquiring whether the Board is willing to incur the outlay.

Resolution.—The Board do not consider the road of sufficient importance to justify such heavy expenditure.

VI. Read Hiriyur Taluk Board's resolution No. 4, dated 22nd June last, recommending the introduction of Village Sanitation Rules into villages containing not less than 50 houses.

Resolution.—The opinion of the other Taluk Boards will be invited on the question.

VII. Read Holalkere Taluk Board's resolution No. 4, dated 4th April 1904, recommending that owing to the want of convenient houses at Holalkere, the Amildar may be permitted to occupy a portion of the musafirkhana there on payment of reasonable rent.

Resolution.—The Board consider that the portion of the musafirkhana proposed to be set apart for the use of travellers is hardly sufficient for the purpose. The plan with the records will therefore be returned to the Assistant Commissioner, Davangere Division, with a request that modified proposals may be submitted for the consideration of the Board.

VIII. Read Hosdurga Taluk Board's Resolution No. 1 of the 25th April 1904, suggesting the construction of a musafirkhana at Madadakere for the convenience of travellers between Hosdurga and Marikanave.

Resolution.—The Board approve of the proposal which will be taken in hand when funds permit.

IX. Read Hosdurga Taluk Board's resolution No. 2 of 8th June 1904, suggesting that the road between Hosdurga and Haluramesswara be kindly ordered to be repaired for reasons stated therein.

Resolution.—The Amildar will be asked to submit an estimate for repairing the cart-track referred to.

X. Read Davangere Assistant Commissioner's yadi No. 222, dated 28th August 1904, recommending the employment of a toti for the 3rd class travellers' bungalow at Bidarkere Railway Station.

Resolution.—A toti is necessary and will be recommended to Government, his pay being fixed at Rs. 4.

XI. Read Government Notification No. 1368-56-2—L. B., dated 16th August 1904, appointing Mr. Nerlahalli Sannappa, a member of the Molakalmuru Taluk Board, as a member of the District Board, in place of Mr. Adoni Narasingappa, deceased.

Resolution.—Recorded.

XII. *Resolved* that the next meeting of the District Board be held on 20th December 1904.

No. 7—15-10-1901.—Copy is sometimes sent to the Press late on Wednesday evenings for publication in the next day's Gazette. It is therefore requested that when spare copies are wanted, a note to that effect, stating the number of copies, be made at foot of such notification, etc.

No. 10—15-10-1901.—If no instructions, either at foot of notifications, or separately by docket, accompany any matter, it will be printed in the language in which it is written, and published only once.

The Government of His Highness the Maharaja are pleased, under Section 38 of the City of Mysore Improvements Regulation, III of 1903, to prescribe the following Rules for the grant of loans to persons, not being Government servants, to enable them to build houses and make other improvements in the Mysore City under Section 27 (3) of the said Regulation :—

1. Applications for loans may be made to the Chairman of the Board of Trustees for the Improvements of the City of Mysore, and shall contain the particulars specified in Form A (appended) and be signed by the applicant.

2. They shall be presented in person and shall contain the following information in the column of remarks in Form A—

I. Whether the applicant proposes to supplement the loan by any private capital, and if so, to what extent.

II. The estimated total cost of the building proposed to be constructed or of the improvements, and the probable period that will be occupied in its construction. When the foregoing particulars are not entered in the application, the Chairman shall ascertain them so far as may be possible from the oral statement of the applicant or otherwise, record them on the application or on a paper to be attached thereto, and have them read over to the applicant and acknowledged by him to be correct.

3. The loans shall be granted :—

(a) For building new houses in the Extensions of the City or on sites re-allotted in the City or elsewhere in the City with the approval of the Board.

(b) For the sanitary improvements of the existing houses both in the Extensions and in the City such as :—

(i) Conversion of mud floors into floors with mortar concrete or with flooring tiles.

(ii) Conversion of bamboo pot-tiled or thatched roof into improved tiled or terraced roof.

(iii) Conversion of mud walls into burnt brick walls.

(iv) Constructing proper drains and making sewage connections.

(c) For erecting separate cattle sheds, etc.

4. Collateral security shall be offered by the applicants for twice the amount of the loan applied for, and in the absence of the same, the Chairman may take the personal security of two respectable persons.

5. The Chairman shall, after seeing that the application contains all the necessary particulars, satisfy himself by making such enquiries as he deems necessary as to the sufficiency of the collateral security or personal security as the case may be.

6. On complétion of the enquiry, the Chairman shall dispose of the application on its merits, and direct the grant of the loan either in full or in part, as is deemed desirable.

7. The Chairman will sanction loans not exceeding Rs. 200 in each case on his own authority, and all loans exceeding that amount, with the sanction of the Board.

8. If, on a review of the local enquiry, and such further investigation, as may be deemed necessary, the Chairman is not satisfied about the sufficiency of the collateral security, or the solvency of the sureties, it shall be lawful for him either to reject the application for the loan or in case the loan is required for building a new house, postpone disposal of the application, till substantial progress is made with the construction of the building, and then refer the application for the special orders of the Board.

9. When a reference is made to the Board under the provisions of clause 8 above, by the Chairman, the Board may dispense with the requirements of the rules regarding collateral and personal security, and grant the loan either in whole or part as may seem proper to the Board.

10. Interest shall be charged on loans at the rate of 3 % per annum. If the Chairman considers that in special cases, the loan should be granted at a lower rate of interest or without interest, he should place such cases before the Board for decision.

11. When an order granting the loan is passed, it shall be endorsed by the applicant to the effect that he has understood and agreed to all conditions specified in the loan order (Form B) and it shall be signed by him in the presence of two witnesses who shall also attest the endorsement. The person applying for a loan shall also, as soon after the loan is sanctioned as possible, and before obtaining it, execute a bond in Form C.

12. If any property other than the property of the applicant is pledged or mortgaged as collateral security for the repayment of the loan, the order shall be similarly endorsed, signed and attested by the sureties and witnesses.

13. The applicant shall sign an agreement binding himself to conform to the provisions contained in the "Building Bye Laws."

14. The order granting the loan shall be in Form B appended to these rules. It shall be retained in the office of the Chairman and a copy of it shall be given to the applicant.

15. The security bond to be executed by a surety, if any, shall be in Form D appended.

16. The Chairman shall, at his discretion, direct the loan to be paid in instalments according to the progress of the work shown. In no case, prior to the final payment, shall the instalment or aggregate of instalments exceed 75% of the value of the materials collected or work executed.

17. When the loan is paid in instalments, interest at 3% per annum shall be charged on the loan, only from the date of the actual payment of the last instalment, none being charged on previous instalments.

18. The loan granted with interest at 3 per cent per annum shall be repaid by the applicant by means of quarterly instalments, the first commencing three months after completion of the building. The number of such instalments and the period covered by the same shall be determined by the Chairman after due consideration of all the circumstances of the case, but the period of repayment shall not exceed the maximum limit of 10 years. If in any case a longer period for repayment is desirable, the special sanction of the Board shall be obtained on a full report of the circumstances of the case.

Provided that, if default is made in the payment of any instalment, interest may be charged thereon at 5 per cent per annum.

19. The applicant may discharge the loan with interest due thereon at any time before the date on which it is repayable, and in such cases the Board shall remit one-half of the interest paid by the applicant in respect of the loan from the date of its grant to the date on which it may be discharged.

20. Before the repayment of the loan in full, all transfers of any interest in the building for the construction or improvement of which the loan has been obtained, by gift, sale, mortgage or lease exceeding five years, shall be void, unless they are made with the consent of the Board, whether such transfer is made by the applicant or by his heirs in Law, after his death.

21. If the house or the improvements are not completed, as agreed to, within the prescribed period from the date of the grant of the license to build the house or effect the improvements, the site, the unfinished structure, and the materials at site, shall be liable to be appropriated towards the complete or partial discharge of the loan made.

22. In cases in which the unfinished structure is appropriated as aforesaid, it shall be lawful for the Chairman to complete the structure and sell the same by public auction, any difference between the amount due to Government and the sale proceeds being recovered from the applicant in accordance with the provisions contained in the following para.

23. All sums payable under these rules shall be recoverable as provided for in Section (45) of the Mysore City Improvement Regulation (III of 1903).

By order,
B. K. VENKATAVARADAIYENGAR,

J. SMYTH, M. D., *Lt.-Col., I. M. S.*
Surgeon in charge.

Note on the nature of Malaria, how it is spread, how we may protect ourselves from it and how we must treat the disease.

1. *The Nature of Malaria.*—Not many years ago many believed that malaria was contracted by drinking bad water. It was thought to be something in the water, by swallowing which one caught the "Cold and Fever." Others again thought that one got malaria from breathing bad air in swampy places, the belief being that it was something in the air, the inhaling of which caused "Cold and Fever." But now it is known that it is nothing which we drink, nor anything which we inhale that causes "Cold and Fever". The cause of it is a very small animal which has to get into the blood, but not by swallowing nor by inhaling.

Where this very small animal came from in the first place it is difficult to say, but what is more important to know is that it lives in the blood of people who have "Cold and Fever," and in many of the people who have not active cold and fever but the big spleen which has resulted from many attacks of this disease.

2. *How the disease is spread.*—The disease is spread from one person to another by means of certain mosquitoes which live in malarious places. These mosquitoes while taking their regular meal of blood from a person who has the malaria animal in his blood, suck up also many of these animals. The mosquitoes with these animals in their stomachs then go to get a meal of blood from a healthy person, and in doing so they inject the malaria animal into the

healthy man who soon developes cold and fever, while myriads of malaria animals are rapidly produced in his blood, and he becomes a source from which mosquitoes may draw infection wherewith to infect other healthy men.

This is the way malaria is spread.

3. *How to protect oneself from Malaria.*—It is clear from the above that if there were no mosquitoes there would be no malaria, and if we could prevent ourselves from being bitten by mosquitoes we should never contract malaria. The lesson is that we must try and get rid of the mosquitoes as far as possible, and if this is not entirely practicable we must keep out of the mosquitoe's way as much as possible. Now in order to maintain the existence of mosquitoes we must allow them a certain amount of stagnant water to breed in. For practical purposes it may be stated that mosquitoes cannot propagate their species without stagnant water. The secret of the extinction of mosquitoes is therefore to see that no stagnant water lies near our houses, that is, not within 500 yards of our houses. All stagnant pools must be drained, and those that cannot be drained ought to have fish grown in them if they are large, or kerosine oil poured on their surface weekly if they are small. A favorite place for malaria mosquitoes to grow is the hoof track of a bullock which may contain a quart or two of water. It is not every kind of mosquito that can spread malaria. The common mosquito that lives in dirty water in the back-yards does not spread malaria. The malaria mosquito likes clean water. Nevertheless it is well to destroy all sorts of mosquitoes, for the other kinds, if they do not spread malaria may spread other disease quite as bad. They all propagate their species in water, so the same procedure that destroys the malaria mosquito destroys the others also. So one must not keep chatties of water standing unemptied for days nor collection of dirty water undrained near the house. If we do we shall certainly be infested by mosquitoes. It is not enough that one house-holder observe these rules, every one in the village must do so. If any single villager neglects these rules he renders void the efforts of all the others, for the mosquitoes he breeds by his carelessness easily find their way into the other houses. Villagers should therefore punish any one of their members who by carelessness endanger their lives or interfere with their comfort in this way. So much for the actual destruction of the mosquito.

The next point to observe is to keep out of the mosquitoe's way as much as possible. As they only bite at night we should not expose ourselves where they exist at night. Workers should be in out of the fields before sun set. Then, if there are mosquitoes in the house itself, various methods are recommended for keeping them at a distance. The best is to sleep under a mosquito net, but only the wealthy can afford this. Filling the room with strong smoke is useful for an hour or so before lying down to rest. But unless the house is absolutely shut up the mosquitoes will come in very soon, and though the sleeper may be unconcious of it he will be bitten and perhaps inoculated with malaria. Smearing the body with certain oils is also of some use.

4. The best medicine to take for this disease is quinine which can be had very cheaply in the Post Offices, etc. For a person above 15 years, ten grains every 8 hours is the proper dose, to be continued for 24 hours after the fever ceases. Between 5 and 15 years, 2½ grains for 5 years and an extra ½ grain for each additional year. An infant 3 months old can take one grain every 8 hours—a year old can take 2 grains, and then ½ grain for each year above this till the 5th year. The medicine often causes noises in the ears but this soon passes off. A purge should always be taken before beginning quinine unless diarrhœa already exist.

PART III.

Legislative Measures and Rules thereunder.

NOTIFICATION.

No. 3738-71-5—*Ml.*, *dated* 3—4*th November* 1904.

The Government of His Highness the Maharaja are pleased, under Section 38 of the City of Mysore Improvements Regulation, III of 1903, to prescribe the following Rules for the grant of loans to persons, not being Government servants, to enable them to build houses and make other improvements in the Mysore City under Section 27 (3) of the said Regulation :—

1. Applications for loans may be made to the Chairman of the Board of Trustees for the Improvements of the City of Mysore, and shall contain the particulars specified in Form A (appended) and be signed by the applicant.

2. They shall be presented in person and shall contain the following information in the column of remarks in Form A—

I. Whether the applicant proposes to supplement the loan by any private capital, and if so, to what extent.

II. The estimated total cost of the building proposed to be constructed or of the improvements, and the probable period that will be occupied in its construction. When the foregoing particulars are not entered in the application, the Chairman shall ascertain them so far as may be possible from the oral statement of the applicant or otherwise, record them on the application or on a paper to be attached thereto, and have them read over to the applicant and acknowledged by him to be correct.

3. The loans shall be granted :—

(a) For building new houses in the Extensions of the City or on sites re-allotted in the City or elsewhere in the City with the approval of the Board.

(b) For the sanitary improvements of the existing houses both in the Extensions and in the City, such as :—

(i) Conversion of mud floors into floors with mortar concrete or with flooring tiles.

(ii) Conversion of bamboo pot-tiled or thatched roof into improved tiled or terraced roof.

(iii) Conversion of mud walls into burnt brick walls.

(iv) Constructing proper drains and making sewage connections.

(c) For erecting separate cattle sheds, etc.

4. Collateral security shall be offered by the applicants for twice the amount of the loan applied for, and in the absence of the same, the Chairman may take the personal security of two respectable persons.

5. The Chairman shall, after seeing that the application contains all the necessary particulars, satisfy himself by making such enquiries as he deems necessary as to the sufficiency of the collateral security or personal security as the case may be.

6. On completion of the enquiry, the Chairman shall dispose of the application on its merits, and direct the grant of the loan either in full or in part, as is deemed desirable.

7. The Chairman will sanction loans not exceeding Rs. 200 in each case on his own authority, and all loans exceeding that amount, with the sanction of the Board.

8. If, on a review of the local enquiry, and such further investigation, as may be deemed necessary, the Chairman is not satisfied about the sufficiency of the collateral security, or the solvency of the sureties, it shall be lawful for him either to reject the application for the loan or in case the loan is required for building a new house, postpone disposal of the application, till substantial progress is made with the construction of the building, and then refer the application for the special orders of the Board.

9. When a reference is made to the Board under the provisions of clause 8 above, by the Chairman, the Board may dispense with the requirements of the rules regarding collateral and personal security, and grant the loan either in whole or part as may seem proper to the Board.

10. Interest shall be charged on loans at the rate of 3% per annum. If the Chairman considers that in special cases, the loan should be granted at a lower rate of interest or without interest, he should place such cases before the Board for decision.

11. When an order granting the loan is passed, it shall be endorsed by the applicant to the effect that he has understood and agreed to all conditions specified in the loan order (Form B) and it shall be signed by him in the presence of two witnesses who shall also attest the endorsement. The person applying for a loan shall also, as soon after the loan is sanctioned as possible, and before obtaining it, execute a bond in Form C.

12. If any property other than the property of the applicant is pledged or mortgaged as collateral security for the repayment of the loan, the order shall be similarly endorsed, signed and attested by the sureties and witnesses.

13. The applicant shall sign an agreement binding himself to conform to the provisions contained in the "Building Bye Laws."

14. The order granting the loan shall be in Form B appended to these rules. It shall be retained in the office of the Chairman and a copy of it shall be given to the applicant.

15. The security bond to be executed by a surety, if any, shall be in Form D appended.

16. The Chairman shall, at his discretion, direct the loan to be paid in instalments according to the progress of the work shown. In no case, prior to the final payment, shall the instalment or aggregate of instalments exceed 75% of the value of the materials collected or work executed.

17. When the loan is paid in instalments, interest at 3% per annum shall be charged on the loan, only from the date of the actual payment of the last instalment, none being charged on previous instalments.

18. The loan granted with interest at 3 per cent per annum shall be repaid by the applicant by means of quarterly instalments, the first commencing three months after completion of the building. The number of such instalments and the period covered by the same shall be determined by the Chairman after due consideration of all the circumstances of the case, but the period of repayment shall not exceed the maximum limit of 10 years. If in any case a longer period for repayment is desirable, the special sanction of the Board shall be obtained on a full report of the circumstances of the case.

Provided that, if default is made in the payment of any instalment, interest may be charged thereon at 5 per cent per annum.

19. The applicant may discharge the loan with interest due thereon at any time before the date on which it is repayable, and in such cases the Board shall remit one-half of the interest paid by the applicant in respect of the loan from the date of its grant to the date on which it may be discharged.

20. Before the repayment of the loan in full, all transfers of any interest in the building for the construction or improvement of which the loan has been obtained, by gift, sale, mortgage or lease exceeding five years, shall be void, unless they are made with the consent of the Board, whether such transfer is made by the applicant or by his heirs in Law, after his death.

21. If the house or the improvements are not completed, as agreed to, within the prescribed period from the date of the grant of the license to build the house or effect the improvements, the site, the unfinished structure, and the materials at site, shall be liable to be appropriated towards the complete or partial discharge of the loan made.

22. In cases in which the unfinished structure is appropriated as aforesaid, it shall be lawful for the Chairman to complete the structure and sell the same by public auction, any difference between the amount due to Government and the sale proceeds being recovered from the applicant in accordance with the provisions contained in the following para.

23. All sums payable under these rules shall be recoverable as provided for in Section (45) of the Mysore City Improvements Regulation (III of 1903).

By order,
B. K. VENKATAVARADAIYENGAR,
Secy. to Govt., Gen. & Rev. Dept.

IN THE CHIEF COURT OF MYSORE.

CIVIL SIDE.

Addendum dated 26th November 1904, to Civil Rule of Practice No. 15, dated 29th November 1878.

The Chief Court directs that the following sentence be added to para 6 of Civil Rule of Practice No. 15, dated 29th November 1878.

Circular letter No. 163, dated 26th November 1904.

To—The Judges of all Civil Courts.

Sir,

In continuation of the instructions contained in Circular letter No. 158, dated the 17th September 1903, I am directed to point out that there is nothing in the terms of Section 17 A of the Mysore Civil Courts' Regulation, II of 1898, to prevent an order being passed by a Court for refund of half the institution fee paid on a plaint where without contest the defendant appears and fully and unconditionally admit the plaintiff's claim. The claim and the admission without contest would ordinarily, if the Court considers proper, be sufficient to constitute an agreement of both parties.

I have the honor to be,
Sir,
Your most obedient servant,
V. A. RAJARATNA MUDALIAR, *Registrar.*

J. SMYTH, M.D., *Lt.-Col., I.M.S.*
Surgeon in charge.

Note on the nature of Malaria, how it is spread, how we may protect ourselves from it and how we must treat the disease.

1. *The Nature of Malaria.*—Not many years ago many believed that malaria was contracted by drinking bad water. It was thought to be something in the water, by swallowing which one caught the "Cold and Fever." Others again thought, that one got malaria from breathing bad air in swampy places, the belief being that it was something in the air, the inhaling of which caused "Cold and Fever." But now it is known that it is nothing which we drink, nor anything which we inhale that causes "Cold and Fever". The cause of it is a very small animal which has to get into the blood, but not by swallowing nor by inhaling.

Where this very small animal came from in the first place it is difficult to say, but what is more important to know is that it lives in the blood of people who have "Cold and Fever," and in many of the people who have not active cold and fever but the big spleen which has resulted from many attacks of this disease.

2. *How the disease is spread.*—The disease is spread from one person to another by means of certain mosquitoes which live in malarious places. These mosquitoes, while taking their regular meal of blood from a person who has the malaria animal in his blood, suck up also many of these animals. The mosquitoes with these animals in their stomachs then go to get a meal of blood from a healthy person, and in doing so they inject the malaria animal into the healthy man who soon developes cold and fever, while myriads of malaria animals are rapidly produced in his blood, and he becomes a source from which mosquitoes may draw infection wherewith to infect other healthy men.

This is the way malaria is spread.

3. *How to protect oneself from Malaria.*—It is clear from the above that if there were no mosquitoes there would be no malaria, and if we could prevent ourselves from being bitten by mosquitoes we should never contract malaria. The lesson is that we must try and get rid of the mosquitoes as far as possible, and if this is not entirely practicable we must keep out of the mosquitoe's way as much as possible. Now in order to maintain the existence of mosquitoes we must allow them a certain amount of stagnant water to breed in. For practical purposes it may be stated that mosquitoes cannot propagate their species without stagnant water. The secret of the extinction of mosquitoes is therefore to see that no stagnant water lies near our houses, that is, not within 500 yards of our houses. All stagnant pools must be drained, and those that cannot be drained ought to have fish grown in them if they are large, or kerosine oil poured on their surface weekly if they are small. A favorite place for malaria mosquitoes to grow is the hoof track of a bullock which may contain a quart or two of water. It is not every kind of mosquito that can spread malaria. The common mosquito that lives in dirty water in the back-yards does not spread malaria. The malaria mosquito likes clean water. Nevertheless it is well to destroy all sorts of mosquitoes, for the other kinds, if they do not spread malaria may spread other disease quite as bad. They all propagate their species in water, so the same procedure that destroys the malaria mosquito destroys the others also. So one must not keep chatties of water standing unemptied for days nor collection of dirty water undrained near the house. If we do we shall certainly be infested by mosquitoes. It is not enough that one house-holder observe these rules, every one in the village must do so. If any single villager neglects these rules he renders void the efforts of all the others, for the mosquitoes he breeds by his carelessness easily find their way into the other houses. Villagers should therefore punish any one of their members who by carelessness endanger their lives or interfere with their comfort in this way. So much for the actual destruction of the mosquito.

The next point to observe is to keep out of the mosquitoe's way as much as possible. As they only bite at night we should not expose ourselves where they exist at night. Workers should be in out of the fields before sun set. Then, if there are mosquitoes in the house itself, various methods are recommended for keeping them at a distance. The best is to sleep under a mosquito net, but only the wealthy can afford this. Filling the room with strong smoke is useful for an hour or so before lying down to rest. But unless the house is absolutely shut up the mosquitoes will come in very soon, and though the sleeper may be unconcious of it he will be bitten and perhaps inoculated with malaria. Smearing the body with certain oils is also of some use.

4. The best medicine to take for this disease is quinine which can be had very cheaply in the Post Offices, etc. For a person above 15 years, ten grains every 8 hours is the proper dose, to be continued for 24 hours after the fever ceases. Between 5 and 15 years, 2½ grains for 5 years and an extra ½ grain for each additional year. An infant 3 months old can take one grain every 8 hours—a year old can take 2 grains, and then ½ grain for each year above this till the 5th year. The medicine often causes noises in the ears but this soon passes off. A purge should always be taken before beginning quinine unless diarrhœa already exist.

Notice is hereby given that sealed tenders will be received up to 20th December 1904, by the Senior Surgeon and Sanitary Commissioner, Mysore Government, for the supply, by contract, of all articles of diet, etc., (as per list), required for the use of the inmates of the Lunatic and Leper Asylums, the Maternity and the Government Eye Infirmary, Bangalore, from 1st January 1905 to 31st December 1905 both days inclusive.

GOVT. OF H. H. THE MAHARAJA OF MYSORE, GENL. AND REV. SECRETARIAT.
Dated Bangalore, 24th November 1904.

No. 12—80-5.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

EMIGRATION.

Simla, the 18th October 1904.

RESOLUTION.

The following correspondence is published for general information:—

I. From the Governor General of the Commonwealth of Australia to the Governor General of India, dated the 18th August 1904.

"I have the honour to inform Your Excellency that the Minister of State for External Affairs in the Commonwealth Government has had under consideration the question of so administering the Immigration Restriction Act as to afford an opportunity for Indian merchants, students, and tourist travellers to enter the Commonwealth temporarily without being subjected to any restrictions, with the result that it has now been decided that any persons *bona fide* of the classes mentioned desirous of visiting Australia will be admitted to the Commonwealth, provided they are in possession of Passports from the Indian Government sufficiently identifying them and specifying the purpose and probable duration of their visit. Such documents will be accepted by the Commonwealth Government as entitling the holders to freely enter and pass through Australia, the only condition being that the Passports shall be examined at the first port of call.

"2. Upon arrival in the Commonwealth, the education test prescribed by the Immigration Restriction Act will in these cases not be imposed, and such persons will be permitted to land without restriction, but, in the event of their wishing to stay longer than twelve months, an application for a Certificate of Exemption for the desired term should be lodged before the expiry of such time, and the reason for such exemption stated. It will, of course, be understood that in any such cases none of the rights of the Government of the Commonwealth under the Immigration Restriction Act are to be considered as abandoned, and that, should it be found that the concession is being abused, the practice will be subject to review at any time.

"3. An undertaking will be required from all such persons to advice the Customs Officer at the port of departure when they are about to leave the Commonwealth.

"4. At the request of my Prime Minister, I have the honour to bring this matter under Your Excellency's notice, with a request that you will be good enough to inform me whether arrangements can be made in India accordingly. If there is no difficulty in the way, the proposals might take effect from an early date, say, the 1st October next, and the Indian Government might take the necessary steps to give the requisite publicity to the matter at the seaports and principal towns of India.

"5. My Ministers hope that this exemption will be the means of promoting intercourse and improving trade relations between the Commonwealth and the great Indian Empire."

II. From the Governor General of India to the Governor General of the Commonwealth of Australia, letter No. 1086—80-4 (Emigration), dated the 17th October 1904.

"The Government of India have received with mueh pleasure the intimation conveyed in Your Excellency's letter of the 18th August 1904 that the Government of the Australian Commonwealth have decided to so far relax the provisions of the Immigration Restriction Act as to permit Indian merchants, students and tourist travellers to visit Australia under Passports granted by the Indian Government. I have the honour to ask you to convey to your Ministers our cordial acknowledgments for this valuable concession and for the sympathy it evinces with the wishes and feelings of the people of India. We cordially concur with your Ministers in hoping that this exemption of the educated classes of Indians from the restrictions imposed on ordinary immigration will result in more frequent intercourse and in an improvement of trade relations, to the mutual advantage of both countries.

"2. In accordance with the suggestion made in paragraph 4 of your letter the necessary steps have been taken to make known throughout India the relaxation of the present regulations conceded by the Commonwealth Government and instructions have been issued with the object of securing that the privilege is granted only to those to whom it is intended to apply. We have arranged to bring the regulations for the grant of Passports into effect from October 22nd.

"3. Your Excellency's recent participation in the Government of India must make it no less gratifying to you than it is to me to have been the means of communicating to our Indian fellow-subjects this evidence of the regard for their interests felt by the Australian people."

2. In accordance with the concession now granted by the Government of the Commonwealth, Secretaries to Local Governments and Administrations and Agents to the Governor General are empowered to issue Passports to Australia, to Indian merchants, students and tourist travellers who desire to visit Australia temporarily. Each application for a Passport should be accompanied by a statement in the form annexed and should be submitted to the Magistrate

of the District in which the applicant resides (or in the case of a resident in a Native State to the Political Officer) for transmission to the Government of the Province or Agent to the Governor General. The Governor General in Council desirous to impress on Local Governments and Administrations and on Agents to the Governor General the necessity for taking every precaution that a Passport shall not be given to any one not strictly eligible for it under the conditions laid down by the Commonwealth Government.

ORDER.—Ordered that the foregoing Resolution be forwarded to all Governments and Administrations for information and guidance, and to the Foreign Department for communication to the Agents to the Governor General and Political Officers in Native States.

J. WILSON,
Secretary to the Govt. of India.

Form to be filled up by an applicant for a Passport to Australia under the terms of Government of India Resolution No. 12—80-5, *dated* 18*th October* 1904.

JUDICIAL DEPARTMENT.

IN THE CHIEF COURT OF MYSORE.

CIVIL SIDE.

Addendum dated 26th November 1904, to Civil Rule of Practice No. 15, dated 29th November 1878.

The Chief Court directs that the following sentence be added to para 6 of Civil Rule of Practice No. 15, dated 29th November 1878.

"The Head Munshi of every Munsiff's Court shall furnish the like security to the extent of Rs. 250 unless the District Judge shall otherwise direct."

CIVIL SIDE.

Circular letter No. 163, dated 26th November 1904.

To—The Judges of all Civil Courts.

Sir,

In continuation of the instructions contained in Circular letter No. 158, dated the 17th September 1903, I am directed to point out that there is nothing in the terms of Section 17 A of the Mysore Civil Courts' Regulation, II of 1898, to prevent an order being passed by a Court for refund of half the institution fee paid on a plaint, where without contest the defendant appears and fully and unconditionally admit the plaintiff's claim. The claim and the admission without contest would ordinarily, if the Court considers proper, be sufficient to constitute an agreement of both parties.

I have the honor to be,
Sir,
Your most obedient servant,
V. A. RAJARATNA MUDALIAR, *Registrar.*

CIVIL SIDE.

Rule of Practice No. 120, dated 3rd December 1904.

Under Section 652 of the Code of Civil Procedure, the Chief Court has made the following Rules in regard to the costs of copies obtained by parties in suits and proceedings.

In Courts of first instance, costs incurred by the parties in obtaining such copies as they may be required to file under the provision of any law in force or by express order of the Court in any suit or proceeding, will ordinarily be entered in the decree or order in such suit or proceeding.

In appellate Courts, the cost of obtaining copies of the decree and judgment required by law to be filed with the memorandum of appeal will ordinarily be allowed, as also cost of unauthenticated copies of depositions in appeals involving questions of fact, and of such other exhibits or papers as may, in the opinion of the Court, be deemed material for the purpose of the appeal.

The Court, original or appellate, may, in its discretion, also allow the costs of any other copies which, in its opinion, were material for a party to obtain for the purposes of his suit.

J. SMYTH, M.D., *Lt.-Col., I.M.S.*,
Surgeon in charge.

Note on the nature of Malaria, how it is spread, how we may protect ourselves from it and how we must treat the disease.

1. *The Nature of Malaria.*—Not many years ago many believed that malaria was contracted by drinking bad water. It was thought to be something in the water, by swallowing which one caught the "Cold and Fever." Others again thought that one got malaria from breathing bad air in swampy places, the belief being that it was something in the air, the inhaling of which caused "Cold and Fever." But now it is known that it is nothing which we drink, nor anything which we inhale that causes "Cold and Fever". The cause of it is a very small animal which has to get into the blood, but not by swallowing nor by inhaling.

Where this very small animal came from in the first place it is difficult to say, but what is more important to know is that it lives in the blood of people who have "Cold and Fever," and in many of the people who have not active cold and fever but the big spleen which has resulted from many attacks of this disease.

2. *How the disease is spread.*—The disease is spread from one person to another by means of certain mosquitoes which live in malarious places. These mosquitoes while taking their regular meal of blood from a person who has the malaria animal in his blood, suck up also many of these animals. The mosquitoes with these animals in their stomachs then go to get a meal of blood from a healthy person, and in doing so they inject the malaria animal into the healthy man who soon developes cold and fever, while myriads of malaria animals are rapidly produced in his blood, and he becomes a source from which mosquitoes may draw infection wherewith to infect other healthy men.

This is the way malaria is spread.

3. *How to protect oneself from Malaria.*—It is clear from the above that if there were no mosquitoes there would be no malaria, and if we could prevent ourselves from being bitten by mosquitoes we should never contract malaria. The lesson is that we must try and get rid of the mosquitoes as far as possible, and if this is not entirely practicable we must keep out of the mosquitoe's way as much as possible. Now in order to maintain the existence of mosquitoes we must allow them a certain amount of stagnant water to breed in. For practical purposes it may be stated that mosquitoes cannot propagate their species without stagnant water. The secret of the extinction of mosquitoes is therefore to see that no stagnant water lies near our houses, that is, not within 500 yards of our houses. All stagnant pools must be drained, and those that cannot be drained ought to have fish grown in them if they are large, or kerosine oil poured on their surface weekly if they are small. A favorite place for malaria mosquitoes to grow is the hoof track of a bullock which may contain a quart or two of water. It is not every kind of mosquito that can spread malaria. The common mosquito that lives in dirty water in the back-yards does not spread malaria. The malaria mosquito likes clean water. Nevertheless it is well to destroy all sorts of mosquitoes, for the other kinds, if they do not spread malaria may spread other disease quite as bad. They all propagate their species in water, so the same procedure that destroys the malaria mosquito destroys the others also. So one must not keep chatties of water standing unemptied for days nor collection of dirty water undrained near the house. If we do we shall certainly be infested by mosquitoes. It is not enough that one house-holder observe these rules, every one in the village must do so. If any single villager neglects these rules he renders void the efforts of all the others, for the mosquitoes he breeds by his carelessness easily find their way into the other houses. Villagers should therefore punish any one of their members who by carelessness endanger their lives or interfere with their comfort in this way. So much for the actual destruction of the mosquito.

The next point to observe is to keep out of the mosquitoe's way as much as possible. As they only bite at night we should not expose ourselves where they exist at night. Workers should be in out of the fields before sun set. Then, if there are mosquitoes in the house itself, various methods are recommended for keeping them at a distance. The best is to sleep under a mosquito net, but only the wealthy can afford this. Filling the room with strong smoke is useful for an hour or so before lying down to rest. But unless the house is absolutely shut up the mosquitoes will come in very soon, and though the sleeper may be unconcious of it he will be bitten and perhaps inoculated with malaria. Smearing the body with certain oils is also of some use.

4. The best medicine to take for this disease is quinine which can be had very cheaply in the Post Offices, etc. For a person above 15 years, ten grains every 8 hours is the proper dose, to be continued for 24 hours after the fever ceases. Between 5 and 15 years, 2½ grains for 5 years and an extra ½ grain for each additional year. An infant 3 months old can take one grain every 8 hours—a year old can take 2 grains, and then ½ grain for each year above this till the 5th year. GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

EMIGRATION.

Simla, the 18th October 1904.

RESOLUTION.

The following correspondence is published for general information:—

I. From the Governor General of the Commonwealth of Australia to the Governor General of India, dated the 18th August 1904.

"I have the honour to inform Your Excellency that the Minister of State for External Affairs in the Commonwealth Government has had under consideration the question of so administering the Immigration Restriction Act as to afford an opportunity for Indian merchants, students, and tourist travellers to enter the Commonwealth temporarily without being subjected to any restrictions, with the result that it has now been decided that any persons *bona fide* of the classes mentioned desirous of visiting Australia will be admitted to the Commonwealth, provided they are in possession of Passports from the Indian Government sufficiently identifying them and specifying the purpose and probable duration of their visit. Such documents will be accepted by the Commonwealth Government as entitling the holders to freely enter and pass through Australia, the only condition being that the Passports shall be examined at the first port of call.

"2. Upon arrival in the Commonwealth, the education test prescribed by the Immigration Restriction Act will in these cases not be imposed, and such persons will be permitted to land without restriction, but, in the event of their wishing to stay longer than twelve months, an application for a Certificate of Exemption for the desired term should be lodged before the expiry of such time, and the reason for such exemption stated. It will, of course, be understood that in any such cases none of the rights of the Government of the Commonwealth under the Immigration Restriction Act are to be considered as abandoned, and that, should it be found that the concession is being abused, the practice will be subject to review at any time.

"3. An undertaking will be required from all such persons to advice the Customs Officer at the port of departure when they are about to leave the Commonwealth.

"4. At the request of my Prime Minister, I have the honour to bring this matter under Your Excellency's notice, with a request that you will be good enough to inform me whether arrangements can be made in India accordingly. If there is no difficulty in the way, the proposals might take effect from an early date, say, the 1st October next, and the Indian Government might take the necessary steps to give the requisite publicity to the matter at the seaports and principal towns of India.

"5. My Ministers hope that this exemption will be the means of promoting intercourse and improving trade relations between the Commonwealth and the great Indian Empire."

II. From the Governor General of India to the Governor General of the Commonwealth of Australia, letter No. 1086—80-4 (Emigration), dated the 17th October 1904.

"The Government of India have received with much pleasure the intimation conveyed in Your Excellency's letter of the 18th August 1904 that the Government of the Australian Commonwealth have decided to so far relax the provisions of the Immigration Restriction Act as to permit Indian merchants, students and tourist travellers to visit Australia under Passports granted by the Indian Government. I have the honour to ask you to convey to your Ministers our cordial acknowledgments for this valuable concession and for the sympathy it evinces with the wishes and feelings of the people of India. We cordially concur with your Ministers in hoping that this exemption of the educated classes of Indians from the restrictions imposed on ordinary immigration will result in more frequent intercourse and in an improvement of trade relations, to the mutual advantage of both countries.

"2. In accordance with the suggestion made in paragraph 4 of your letter the necessary steps have been taken to make known throughout India the relaxation of the present regulations conceded by the Commonwealth Government and instructions have been issued with the object of securing that the privilege is granted only to those to whom it is intended to apply. We have arranged to bring the regulations for the grant of Passports into effect from October 22nd.

"3. Your Excellency's recent participation in the Government of India must make it no less gratifying to you than it is to me to have been the means of communicating to our Indian fellow-subjects this evidence of the regard for their interests felt by the Australian people."

2. In accordance with the concession now granted by the Government of the Commonwealth, Secretaries to Local Governments and Administrations and Agents to the Governor General are empowered to issue Passports to Australia, to Indian merchants, students and tourist travellers who desire to visit Australia temporarily. Each application for a Passport should be accompanied by a statement in the form annexed and should be submitted to the Magistrate

of the District in which the applicant resides (or in the case of a resident in a Native State to the Political Officer) for transmission to the Government of the Province or Agent to the Governor General. The Governor General in Council desirous to impress on Local Governments and Administrations and on Agents to the Governor General the necessity for taking every precaution that a Passport shall not be given to any one not strictly eligible for it under the conditions laid down by the Commonwealth Government.

ORDER.—Ordered that the foregoing Resolution be forwarded to all Governments and Administrations for information and guidance, and to the Foreign Department for communication to the Agents to the Governor General and Political Officers in Native States.

J. WILSON,
Secretary to the Govt. of India.

Form to be filled up by an applicant for a Passport to Australia under the terms of Government of India Resolution No. 12—80-5, dated 18th October 1904.

GENERAL AND REVENUE.

No. G. M. F. 276-2 *of* 04-05, *dated 9th December* 1904.

The following letter of His Highness the Maharaja of Mysore is published.

By Order,

B. K. VENKATA VARADA IYENGAR,
Secy. to Govt., Gen. & Rev. Dept.

The Palace, Mysore, 8th December 1904.

I am deeply touched with the numerous expressions of sympathy and grief which have reached me from my own subjects in the State and from sympathizers elsewhere on the sad occasion of the untimely death of my beloved sister MAHARAJAKUMARI KRISHNAJAMMANNIAVARU. The loss of so amiable a member of the family, so devoted a wife and so fond a mother can never be forgotten. At such a trying time, we can but bow in submission to the inscrutable decrees of Providence. To all who have borne with me and my family this grief and have thereby afforded us such a solace and consolation, I wish to express our heart-felt gratitude.

KRISHNA RAJA WADIYAR.

JUDICIAL DEPARTMENT.

IN THE CHIEF COURT OF MYSORE.

CIVIL SIDE.

Addendum dated 26th November 1904, to Civil Rule of Practice No. 15, dated 29th November 1878.

The Chief Court directs that the following sentence be added to para 6 of Civil Rule of Practice No. 15, dated 29th November 1878.

CIVIL SIDE.

Circular letter No. 163, dated 26th November 1904.

To—The Judges of all Civil Courts.

Sir,

In continuation of the instructions contained in Circular letter No. 158, dated the 17th September 1903, I am directed to point out that there is nothing in the terms of Section 17 A of the Mysore Civil Courts' Regulation, II of 1898, to prevent an order being passed by a Court for refund of half the institution fee paid on a plaint where without contest the defendant appears and fully and unconditionally admit the plaintiff's claim. The claim and the admission without contest would ordinarily, if the Court considers proper, be sufficient to constitute an agreement of both parties.

I have the honor to be,
Sir,
Your most obedient servant,
V. A. RAJARATNA MUDALIAR, *Registrar.*

CIVIL SIDE.

Rule of Practice No. 120, dated 3rd December 1904.

Under Section 652 of the Code of Civil Procedure, the Chief Court has made the following Rules in regard to the costs of copies obtained by parties in suits and proceedings:

In Courts of first instance, costs incurred by the parties in obtaining such copies as they may be required to file under the provision of any law in force or by express order of the Court in any suit or proceeding, will ordinarily be entered in the decree or order in such suit or proceeding.

In appellate Courts, the cost of obtaining copies of the decree and judgment required by law to be filed with the memorandum of appeal will ordinarily be allowed, as also cost of unauthenticated copies of depositions in appeals involving questions of fact, and of such other exhibits or papers as may, in the opinion of the Court, be deemed material for the purpose of the appeal.

The Court, original or appellate, may, in its discretion, also allow the costs of any other copies which, in its opinion, were material for a party to obtain for the purposes of his suit.

GOVT. OF H. H. THE MAHARAJA OF MYSORE, GENL. AND REV. SECRETARIAT.
Dated Bangalore 8th December 1904.

By Order,
B. K. VENKATA VARADA IYENGAR,
Secy. to Govt., Gen. & Rev. Dept.

Proceedings of the Government of His Highness the Maharaja of Mysore, Local Fund and Sanitary, Sanitation, dated 1st November 1904.

READ—

Letter No. G. 237, dated the 13th October 1904, from the Senior Surgeon and Sanitary Commissioner with the Government of His Highness the Maharaja of Mysore *in re* the prevention of malaria :—

"I have the honor to invite the attention of Government to the fact that much easily preventable malaria is being generated in this City through the carelessness of officials who ought to know better. A valuable life, a prominent Mysore Officer, has recently been jeopardised in this way. His own compound is kept in perfect condition, but what does that avail when his neighbours grow anopheles by the million ?

2. I suppose public opinion here has not yet advanced sufficiently to justify Government in pronouncing the cultivation of anopheles a criminal offence. But Government can, at least, compel its own officials to keep the compounds attached to their offices free from these pests. No official of any standing can plead ignorance now-a-days of the connection between anopheles and malaria, and how anopheles can be got rid of. It is certainly not ignorance of these facts which leads the officers I have before my mind this moment to tolerate anopheles breeding pools in their office compounds. On the contrary, no one knows better than they the part played by the anopheles in the distribution of malaria. So it must be pure carelessness, or thoughtlessness, or an idea that they are not responsible for the sanitary condition of their office compounds that leads to this result.

3. I would therefore suggest that a circular be issued to Heads of Departments everywhere, to the effect that stagnant water shall on no account be allowed to remain more than 3 days in the compounds attached to their offices, where it is possible to conveniently drain it off or fill up the surface depression forming the pool. In cases where such drainage is impossible they should apply to the District Medical and Sanitary Officer or to the Health officer where such exists, to have such undrainable pools periodically examined ; and should mosquito larvæ be discovered, to have the pools treated once a week with kerosine till larvæ are no longer discoverable. But they should be reminded that though larvæ can be killed off in this way in any particular pond, all such ponds are to be regarded thereafter as suspect, and will require constant attention."

No. (3498-537)--SAN. 123-2, DATED BANGALORE, THE 1ST NOVEMBER 1904.

ORDER THEREON.—Communicated to the Heads of Departments, to the Deputy Commissioners, to the Presidents of the Municipal and District Boards as well as to the Presidents of the Bangalore and the Mysore City Municipalities, for information and guidance and for wide publicity.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

EMIGRATION.

Simla, the 18th October 1904.

RESOLUTION.

The following correspondence is published for general information:—

I. From the Governor General of the Commonwealth of Australia to the Governor General of India, dated the 18th August 1904.

"I have the honour to inform Your Excellency that the Minister of State for External Affairs in the Commonwealth Government has had under consideration the question of so administering the Immigration Restriction Act as to afford an opportunity for Indian merchants, students, and tourist travellers to enter the Commonwealth temporarily without being subjected to any restrictions, with the result that it has now been decided that any persons *bona fide* of the classes mentioned desirous of visiting Australia will be admitted to the Commonwealth, provided they are in possession of Passports from the Indian Government sufficiently identifying them and specifying the purpose and probable duration of their visit. Such documents will be accepted by the Commonwealth Government as entitling the holders to freely enter and pass through Australia, the only condition being that the Passports shall be examined at the first port of call.

"2. Upon arrival in the Commonwealth, the education test prescribed by the Immigration Restriction Act will in these cases not be imposed, and such persons will be permitted to land without restriction, but, in the event of their wishing to stay longer than twelve months, an application for a Certificate of Exemption for the desired term should be lodged before the expiry of such time, and the reason for such exemption stated. It will, of course, be understood that in any such cases none of the rights of the Government of the Commonwealth under the Immigration Restriction Act are to be considered as abandoned, and that, should it be found that the concession is being abused, the practice will be subject to review at any time.

"3. An undertaking will be required from all such persons to advice the Customs Officer at the port of departure when they are about to leave the Commonwealth.

"4. At the request of my Prime Minister, I have the honour to bring this matter under Your Excellency's notice, with a request that you will be good enough to inform me whether arrangements can be made in India accordingly. If there is no difficulty in the way, the proposals might take effect from an early date, say, the 1st October next, and the Indian Government might take the necessary steps to give the requisite publicity to the matter at the seaports and principal towns of India.

"5. My Ministers hope that this exemption will be the means of promoting intercourse and improving trade relations between the Commonwealth and the great Indian Empire."

II. From the Governor General of India to the Governor General of the Commonwealth of Australia, letter No. 1086—80-4 (Emigration), dated the 17th October 1904.

"The Government of India have received with much pleasure the intimation conveyed in Your Excellency's letter of the 18th August 1904 that the Government of the Australian Commonwealth have decided to so far relax the provisions of the Immigration Restriction Act as to permit Indian merchants, students and tourist travellers to visit Australia under Passports granted by the Indian Government. I have the honour to ask you to convey to your Ministers our cordial acknowledgments for this valuable concession and for the sympathy it evinces with the wishes and feelings of the people of India. We cordially concur with your Ministers in hoping that this exemption of the educated classes of Indians from the restrictions imposed on ordinary immigration will result in more frequent intercourse and in an improvement of trade relations, to the mutual advantage of both countries.

"2. In accordance with the suggestion made in paragraph 4 of your letter the necessary steps have been taken to make known throughout India the relaxation of the present regulations conceded by the Commonwealth Government and instructions have been issued with the object of securing that the privilege is granted only to those to whom it is intended to apply. We have arranged to bring the regulations for the grant of Passports into effect from October 22nd.

"3. Your Excellency's recent participation in the Government of India must make it no less gratifying to you than it is to me to have been the means of communicating to our Indian fellow-subjects this evidence of the regard for their interests felt by the Australian people."

2. In accordance with the concession now granted by the Government of the Commonwealth, Secretaries to Local Governments and Administrations and Agents to the Governor General are empowered to issue Passports to Australia, to Indian merchants, students and tourist travellers who desire to visit Australia temporarily. Each application for a Passport should be accompanied by a statement in the form annexed and should be submitted to the Magistrate

of the District in which the applicant resides (or in the case of a resident in a Native State to the Political Officer) for transmission to the Government of the Province or Agent to the Governor General. The Governor General in Council desirous to impress on Local Governments and Administrations and on Agents to the Governor General the necessity for taking every precaution that a Passport shall not be given to any one not strictly eligible for it under the conditions laid down by the Commonwealth Government.

ORDER.—Ordered that the foregoing Resolution be forwarded to all Governments and Administrations for information and guidance, and to the Foreign Department for communication to the Agents to the Governor General and Political Officers in Native States.

The Government of His Highness the Maharaja of Mysore are pleased to direct the following alterations being made in the Rules for the Maintenance of Tanks, published under the late Chief Commissioner's Notification No. 65, dated the 2nd October 1873:—

(i) In Rule 1, omit the words "and he is to be assisted in this duty by the hobli shekdar."

(ii) At the end of Rule 3, add the following clause:—

"For the purposes of this rule one rupee of the dry or mohatarfa assessment shall be regarded as one-third of a rupee of wet and garden assessment."

(iii) In Rule 4, insert the words and letter "as detailed in Appendix A" between the words "maintenance" and "will."

(iv) In the first and second sentences of Rule 5, substitute the word "Patel" for "village authorities."

(v) In Rule 6, substitute the words "Patel is" for the words "village authorities above mentioned are."

(vi) In Rule 8, substitute the words "October and January" for "December and March," and the words "a responsible officer" for the "Peishcar, Sheristadar or Taluk Mestri," and add the word and letter "Appendix B" after the word "Form" omitting the letter "A."

(vii) In Rule 11, substitute the word "Taluks" for "Sub-Divisions."

(viii) In the heading of the form of Inspection Report appended to the Rules, substitute the word and letter "Appendix B" for "Form A," and in the heading of column 12 of the form, substitute the words "condition of subsidiary works including feeders and distribution channels" for "Signature and remarks," and open another column, 13, for "Signature and remarks."

X. The Rules altered as above will be as follows :—

Rule 1.—The enforcement of the Rules for Tank Maintenance is entrusted to the Patel of the village to which the tank or tanks are attached.

Rule 2.—The individuals to be held responsible for the maintenance and up-keep of the tanks are the Pattadars, Shikmidars, Inamdars and others holding lands attached to the village, either dry or wet; inhabitants of the village, and all others deriving any benefit whatever from the tank, either directly or indirectly.

Rule 3.—The proportion of work to be done by each of the above indicated individuals will be decided by the Patel and Shekdar, according to the amount paid by each to the Government for lands, houses, or other property etc., attached to the village—such proportion to be constant, no matter what quantity of work has to be carried out. Dissentients to have the ordinary right of appeal to higher authority. The proportion of the work to be done by Inamdars will be fixed in the same manner; their lands, etc., being valued at the same rates as those paid for similar property belonging to Sirkar raiyats.

For the purposes of this Rule, one rupee of the dry or mohatarfa assessment shall be regarded as one-third of a rupee of wet and garden assessment.

Rule 4.—The works falling under the head of Tank Maintenance as detailed in Appendix A will be ordinary earth and turf work, repairs of every description connected with the tanks and their subsidiary works; excepting such as may be specially exempted and noted in the tank book as to be kept in repair by Government.

Rule 5.—The above repairs shall, as a rule, be carried out simultaneously at periods to be fixed by the Patel; but when necessary (as in cases of damages done by rain, floods, etc.,) the requisition of the patel for immediate repairs must be at once attended to.

Rule 6.—In case of default by any individual in the execution of his obligations as above laid down, the patel is empowered and required to carry out the portion of the work that ought to have been done by the defaulter, by paid labor, the cost being recovered from the defaulter as a revenue demand.

Rule 7.—The village patel will be held primarily responsible that the tanks are maintained up to the standard laid down for each in the tank book, and it will be the duty of the Shekdar to satisfy himself, by personal inspection in each case, that this has been done.

Rule 8.—A regular inspection of each tank in his taluk shall be made annually, between the months of October and January by the Amildar himself, so far as is possible; otherwise by a responsible officer specially deputed for such duty by the Amildar, and the results of this inspection are to be entered in a register as per annexed form, Appendix B.

Rule 9.—Whenever a tank, on such inspection, is found not to be up to the standard, a second inspection is to be made of the tank prior to the end of April, by which time the repairs must be completed, failing which, the unexecuted repairs will be carried out by the Amildar and the cost recovered from the defaulters as a revenue demand.

Rule 10.—A duplicate copy of the register will be forwarded by the Amildar to the District Revenue Officer prior to the 1st June by which date all tank works should be completed.

Rule 11.—Assistant Commissioners in charge of Taluks or otherwise employed in Taluks are expected during the period of Jamabandi and on other convenient occasions, personally to inspect as many tanks as possible, and test the accuracy of the Taluk returns, entering the date of inspection and their remarks in the form attached to the tank book for that purpose. The result of their inspection will be communicated to the Deputy Commissioner at once on completion.

Rule 12.—Similar duties will be performed by the Deputy Commissioner, who will be held responsible that the above mentioned rules are duly and intelligently carried out and not allowed to become a mere form.

Rule 13.—Works ordered to be carried out to any tank by an officer of the Public Works Department of the Engineer grade will be done at once on that officer's responsibility Should any portion of such work form no part of the duty of the raiyats, the usual notification of sanction for the same will be submitted by the Amildar through the proper channel. Work considered requisite after inspection by an officer of the Public Works Department of the subordinate grade, will be reported by him without delay to his departmental superior, and in cases of urgency direct to the Amildar also.
